

CHAPTER III

METHODS OF RESERCH

A. Design of Research

This research is an effort of searching knowledge and defining it continuously, carefully toward literary cases. It means that the literary research is a science that has obvious object, method and approach. Literary research as a scientific activity must be supported by appropriate method.

The writer use analyzed descriptively qualitative. As stated by Creswell (2009), The qualitative research is “a means for exploring and understanding the meaning individuals or groups ascribe to a social or human problem”. The type of this research is descriptive qualitative because this research is trying to find out and interpret the educational value in Miracle Worker movie. According to Mileys (1985, p.1), “qualitative data tends to be in the form of words than series of number”. It does not present data and the result in the form of digits or static but it yields the data and the result in the form phenomena description

B. Subject of Research

The subject of this research is a movie entitled Miracle Worker produced by Adam Shankman and Jennifer Gibgot that released in 2000.

C. Object of Research

The object of this research is phrasal verbs related to educational values in movie entitled *Miracle Worker* produced by Adam Shankman and Jennifer Gibgot that released in 2000.

D. Data and Source of Data

1. Data

The data is going to be analyzed in this research consist of primary data and secondary data.

- a) Data about the phrasal verbs used by characters in the movie “*Miracle Worker*”
- b) Review of the movie “*Miracle Worker*”
- c) English subtitle of the movie “*Miracle Worker*”
- d) Synopsis of the movie “*Miracle Worker*”

2. Source of data

This thesis is library-based research and while working through the research, the writer tries to find out about data sources that refer to certain textbooks, online resources, journals, that related to the study phrasal verbs and educational values.

E. Technique for Data Collection

The writing of this proposal is entirely done though library research. The writer will collect several data of the literatures, like expressions, phrases,

statements, etc that are collected from Miracle Worker movie. The data are collected by watching the movie and identifying the phrasal verbs related to educational values, then selecting the data dealing with the problems. Afterwards, to take evidences related to the available questions.

F. Techniques of Data Processing and Analysis

a. Techniques of data processing

In this study, the writer uses three techniques of data processing, they are:

1) Listing

The writer makes list of phrasal verbs and then grouping them.

2) Editing

This technique is used in the purpose of re-examining all of collected data to make sure whether they have already completed or not.

3) Clarify

The writer will clarify all of those data in order to make easy within presenting it.

b. Data analysis

To analyse the data, the writer uses content analysis. Therefore, the analysis will be deeper as it considers about every meaning of the phrasal verbs and the relation with educational values as described in the following steps:

- a. classifying in the phrasal verbs based on the characters and the meaning.
- b. analyzing the meaning of the phrasal verbs and describe the vent based on characters situations
- c. finding the educational values that related to those phrasal verbs in the Miracle Worker movie.

G. Research Procedure

There are several steps passed through in completing this library research:

1. Preliminary steps

The preliminary steps cover to hold a prior observation to many films that are interesting which is considered having correlation with the research, to consult interest with guiding lecturers, to make proposal to be accepted English Department and supervisors.

2. Preparatory steps

The preparatory steps cover to hold seminar on research proposal design, to ask the Dean of Faculty for a legal, written mandate for conducting research to literatures found in library.

3. Researching steps

Researching steps cover to find movies that contains educational values, to watch and interpret the movie, to process the movie in a procedural method, then to organize them all proportionality.

4. Organization steps

After the data are collected, the writer will organize all findings in forms of research based on the supervisors' guide.
