

## CHAPTER V

### CLOSURE

#### A. Conclusion

Based on the research result about The Efforts of English Teacher in Developing Professional Competence in MAN 2 Model Banjarmasin, it can be concluded:

1. The researcher obtained information that English teacher in an effort to develop mastery of the material by having many reference books related to the material being taught as well as having textbooks from various kinds of publishers. To develop mastery of the basic competency and basic competencies of subjects/fields of development were taught by attending the subject teacher discussion (MGMP) English language. English Language Teacher in an effort to deveop the use of technology by using internet facilities to find teaching materials, references and questions related to English subjects.
2. The supportive factors of the efforts of English teachers in improving professional competency are library facilities that have many English reference books, besides that there is a school Wi-Fi internet facility that makes it easier for teachers to access the internet to find references related to material learning. The obstructive factors of the efforts of English teachers in improving professional competence is the challenge of always making learning as interesting as possible, always creative, and not boring.

## **B. Suggestion**

Based on the result of this study, there are some necessary conclusions to make as follow:

1. For all the teachers, they should develop their professional competence by never stop to study, add personal experience or knowledge and improve the ability to use technology and communication.
2. For the next research, researcher wants and suggest in taking subject, there should be some teachers which is more than one subject so that we can compare and getting data more accurately.
