

Appendix 1

يَا أَيُّهَا الَّذِينَ آمَنُوا إِن جَاءَكُمْ فَاسِقٌ بِنَبَأٍ فَتَبَيَّنُوا أَن تُصِيبُوا قَوْمًا
بِجَهَالَةٍ فَتُصَدِّحُوا عَلَىٰ مَا فَعَلْتُمْ نَادِمِينَ

“O you who have believed, if there comes to you a disobedient one with information, investigate, lest you harm a people out of ignorance and become, over what you have done, regretful.”

Text for questions 11-15

Supporters of medical treatment argue that medicine should be trusted since it is effective and scientifically proven. They say that there is no need for spiritual methods such as Reiki, Yoga, and Tai Chi. These waste our time, something which is quite precious in our material world. There is medicine that can kill our pain, X-rays that show us our fractured bones or MRI that scans our brain for tumors. We must admit that these methods are very effective in the examples that they provide. However, there are some "everyday complaints" such as back pains, headaches, insomnia, which are treated currently with medicine. When you have a headache, you take an Aspirin, or Vermidon. When you cannot sleep, you take Xanax without thinking of the side effects of these. When you use these pills for a long period, you become addicted to them you cannot sleep without them. We pay huge amounts of money and become addicted instead of getting better. How about a safer and more economical way of healing? When doing Reiki to yourself, you do not need anything except your energy so it is very economical. As for its history, it was discovered in Japan in the early 1900s and its popularity has spread particularly throughout America and Western Europe. In quantum physics,

energy is recognized as the fundamental substance of which the universe is composed. Reiki depends on the energy within our bodies. It is a simple and effective way of restoring the energy flow. There are no side effects and it is scientifically explained.

Text for questions 30-33

Daytime resting helpful or harmful?
by Gail Belsky

Getting some sleep, even a short afternoon nap, may seem like a good thing for people with sleep disorders.

But for those with insomnia and an already decreased desire to sleep at night, midday shut-eye can actually be counterproductive. So, before you curl up on the couch this afternoon, consider whether your quick fix might backfire when you lie down in bed tonight.

If you don't have a problem getting your z's at night, a quick nap can work wonders to pull you through a tiresome or sleep-deprived day. In fact, a 2008 study found that a 45-minute daytime nap can improve memory function. And previous studies have found that naps can lower blood pressure.

Those who suffer from narcolepsy or shift-work syndrome may also benefit from daytime naps, says James Wyatt, PHD, director of the Sleep Disorders Service and Research Center at Rush University Medical Center in Chicago.

However, if you have insomnia, naps present a problem, even if you feel tired during the day. Napping during the day can perpetuate bad sleep habits for people with temporary sleep issues caused by stress, illness, or jet lag too.

"Even just a little bit of a power nap reduces your nighttime sleep drive," says Ralph Downey III, PHD, director of the Sleep Disorders Center at Loma Linda University Medical Center in California.

"The nap becomes nothing more than another episode of fragmented sleep."

Furthermore, if you're constantly fighting the urge to sleep during the day and falling asleep instantly at night, you might have obstructive sleep apnea, a condition in which you stop breathing while you sleep.

In this case, naps won't help. By wearing a continuous positive airway pressure (CPAP) machine that flows oxygen through your nose, however, you'll likely sleep more soundly and wake refreshed-whether from a good night's rest or a quick catnap.

30. Taking a nap is good for....

- A. curing jet lag
- B. lowering blood pressure
- C. treating people who are stressed out
- D. helping people breathe while they sleep
- E. covering the nighttime sleep because of insomnia

31. What is suggestion for people who suffer apnea?

- A. Take a nap
- B. Train brain
- C. Lower blood pressure
- D. Wear CPAP
- E. Take a catnap

32. Which statement shows the negative effect of taking a nap?

- A. Reduce nighttime sleep drive
- B. Raise the blood pressure
- C. Lower the memory function
- D. Better sleep habits
- E. Sleep more soundly

33. "Napping during the day can perpetuate bad sleep habit..."
The underlined word means....

- A. to change something
- B. to cure some illnesses
- C. to cause something to continue
- D. to replace with something better
- E. to stop something from happening

175 Pitkin Pult Road. Apt. No. 7.
Montpelier. VT 05602-2950
April 10,2017

Martin Gavin
175 Pitkin Park Road
Apt. No. 15
Montpelier, VT
056024950

Dear Martin:

Please regard this as a letter of apology for the recent problems that I caused you by moving your belongings in the parking garage without your permission. Believe me, I had no intention of causing you any problems. Over the long weekend I decided to rearrange my space in the garage and install some new shelving on the front wall opposite my parking space.

While I was at it I thought I would also tidy up the entire garage. It was during that process that I noticed that your boxes of books were stored, what I thought was, dangerously close to the electric heating element. So, I took the liberty of moving those boxes to the other side of the garage. It didn't occur to me at the time that this would block the entry and exit on the passenger side of your vehicle. After you brought this to my attention Monday evening I immediately moved your boxes back to where they were stored originally. As you suggested, by stacking them carefully I was able to place them so that there was sufficient safe clearance from the heating element. I trust you will find everything in order now.

I'm really sorry that I didn't check with you first before moving your belongings. I can now see how it would have upset you to return after the holiday weekend and find your belongings moved for no apparent reason. All I can say is that it won't happen again.

Sincerely,
JeffGibson
