

## CHAPTER V

### CLOSURE

#### A. Conclusion

Based on the description and data analysis in the previous chapter, it can be concluded as follows:

##### a. The Use of Socrative Application in Written Test

Socrative application is an application to create quiz questions that have several features that can be designed for a written test. The material is created by "team". The type of questions in written test are multiple choice, true / false, short answer and also guess a picture. Written tests also provide listening section questions for members included in Socrative application to do this written test.

This Socrative application is used by trainer and members. So, for the trainer must have an account first, then log in [socrative.com](https://socrative.com) as a teacher and create a quiz. Then, save and exit and also launch the quiz. Select the delivery method to use. Then trainer will see the members' progress in answering questions and when finished click finish then the results of the members will be accumulated automatically.

The use of Socrative applications by members is simpler than a trainer. So, the use of Socrative application for member directly go to [socrative.com](https://socrative.com) and choose as student and then member fill the room name based on the code

provided by the trainer. Then enter the name and click done. After that, members answer the questions then click finish quiz. So, the member finishes the test and is just waiting for the score to be notified by the trainer.

**b. The Members' Responses Toward The Use of Socrative Application in Written Test**

The members' responses to the use of Socrative applications in written tests can be categorized into positive responses. It can be seen from the results based on the questionnaire and interview to members. Members said that the use of Socrative application in written tests makes it easier for them to answer test questions without carrying stationeries and so on. They are also easy to answer because the questions are related to the material taught while learning +24 meetings. But they have a suggestion regarding this activity that it would be better if the results of the written test are displayed in detail with numbers. And they also gave a response that Socrative had problems if the internet network was unstable or obscene. However, during several sessions of written tests using this application, most of them answered smoothly without any bad network interference, because at MEC also provided free Wi-Fi to answer the question. Therefore, from the results obtained on average they like this use because it is more effective and efficient in terms of time energy and tools.

**B. Suggestion**

Based on the finding of the research, the researcher would like to propose the following suggestion:

- a. A course institution or school that wants to carry out tests related to English or other general subjects would be better if using Socratic application, because this application provides some very interesting features to choose from and various types of questions to be made and we can see results that accumulate automatically.
- b. The next researchers will be better if they can examine various applications, especially for tests. Because by examining applications for tests, we can find out how applications can be used and how various parties view the use of applications in making a test.
