

CHAPTER V

CLOSURE

A. Conclusion

Based on the result of data analysis on this research, the researcher found the result as follows:

1. Students apply different strategy in identify main idea, the students use there are different strategy in identify main: (1) Look first paragraph, (2) Synonym word, (3) Scanning and skimming. The researcher found the result interview with 20 students after the students answer test identify main idea in paragraph, the student apply more than one strategy to identify and each student have differences use the strategy when they feel easy in identification main idea in paragraph.
2. Based on the result of the research, it can be concluded that the ability of students to identify the main idea included in the low category. This is caused by the mean 66 which is categorized as a fair score. The ability of students in reading comprehension in identifying main idea is still low where some students in reading text are only reading briefly without understanding the contents of reading.

B. Suggestions

Based on the results of this research, the researcher suggests for the students and the next researcher. The researcher hopes this suggestion will be put for the students and the next researcher. The suggestions are:

1. For students, it is expected to be able to improve and develop strategies and reading comprehension skills in identifying the main ideas, which will affect the results of student learning achievement, so that later the ability to identify the main ideas in students' reading comprehension can always be improved.
2. For next researchers, it should expand the research with the right theory so that more complete information is obtained about identifying the main ideas in reading comprehension. The researcher hopes that next researchers prepare themselves more in the process of collection and collection and everything so that research can be carried out better.
