

CHAPTER III

RESEARCH METHOD

A. Research Design

This research is “descriptive research” because the researcher wanted to describe about appropriate English Syllabus. by collecting some data from document English Syllabus from Nursing Faculty at University of Muhammadiyah Banjarmasin , and then interview with lecturer who used that English Syllabus.

In conducting the data, the writer use descriptive method. According to (Richards & Schmidt,2002,p.152), descriptive research is “an investigation that attempts to describe accurately and factually a phenomenon, subject or area”, which the researcher tries to give conclusion for current problems based on data, gives data, analysis and interpret it and used theory from Graves in Xenodohidis suggests a systematic ESP syllabus design a consistenct of six steps. Those steps are : Conducting needs assesment, followed with need analysis (both of the process, sometimes just call need analysis), Determining the goals and objective in the sources, Conceptualizing the concept, Selecting and depeloving materials and activities, Organizing the content and activities, Evaluating.

B. Research Setting

The located of this research taken at University of Muhammadiyah Banjarmasin. It is located on S. komp. Hospital of Islamic Banjarmasin South Kalimantan. The time of the research was on June to November 2019.

The researcher did the analysis at the University of Muhammadiyah Banjarmasin because that campus one that has a special program for nursing students, namely study tour abroad every year, they automatically need English to make it easier for them to studying and communicate with the people in during study tour, so the following are the reason researcher want to see the English syllabus that they used, how the English Syllabus is appropriate with their needs. the reasercher wanted to know how do the lecturer designed the English Syllabus and did the English Syllabus appropriate for Nursing at University of Muhammadiyah Banjarmasin.

C. Subject of Research

Subject of research were one English Specific Porpose lecturers and a document of English Syllabus from University of Muhammadiyah Banjarmasin.

D. Data

The data was collected through some sources as follow :

1. Respondent : A Lecturer, interview about how to design English Syllabus for Nursing and document English Syllabus from Nursing faculty at University of Muhammadiyah Banjarmasin.
2. Document : English Syllabus from Nursing Faculty at University of Muhammadiyah Banjarmasin

E. Technique of Data Collecting

To collect the data, the researcher used some techniques, there are:

1. Interview

In this way, the reasearch take an interview with a lecturer whose made English Syllabus from University of Muhammadiyah Banjarmasin.

2. Documentary

This technique is aimed at looking for all written reports or document that perhaps keep any detailed documents for data.

F. Data Analysis

1. Data Processing

- a. Editing

This technique was used to reexamine all of the collected data to make sure whether they a were all ready or not. The edited also includes selecting the needed data from those which was variable.

The part that had been edited was the English Syllabus from the University of Banjarmasin Muhammadiyah to complete

the material in it from Graves in Xenodohidis that researcher used in the analysis of current data. If there is a lack of material or material that is not yet relevant in meeting the ESP standard, it will be justified and redesigned according to the rules that the researcher will use through the source of the material.

b. Coding

The researcher then classifies the data that had been edited before, in accordance to their kinds. and if there was a lack of appropriate material then English specific nursing material will be added according to their needs which will be used in hospital and to communicate with patients and doctors.

2. Data Analysis

After all of the collected data were processed, the researcher analyzes them by descriptive qualitative, used document English Syllabus and interview with lecturer who used that english syllabus to result descriptive data. The data analysis was used to draw the conclusion of research data.
