*(Appendix III)***Transcript of Interview****Interview Responds**

## Student I

- 1) Yes. 3 times in one week
- 2) It's easier to do homework in Google Classroom app than not using app
- 3) Paperless for doing a task. Time saver. Google Classroom can access anytime and anywhere
- 4) Yes, and it's quite helpful for the teacher and also the students
- 5) usually a few times a week we must write or type a sentence or a paragraph in Google Classroom and I guess it can be helpful for increasing my writing skill

## Student II

- 1) No I haven't, I have logged in my Google Classroom for 3 times
- 2) Google Classroom makes learning process easier, especially for the lecturer to give assignment and information
- 3) The difference is we only have to share our writing in there, without share to the lecturer and we can read our friends' writing without download it
- 4) It makes learning easier, for now nothing

5) No, I don't

#### Student III

- 1) No, I haven't used/installed the app. But we've been using Google Classroom website page for one subject/course. About twice a week.
- 2) Do not install the app and the steps to utilize was easy.
- 3) Don't install the app too
- 4) Not the app but the website, but it's easier to collect the students' assignments as we don't have to do it face to face before the assigned class schedule. It's quite interesting, yes.
- 5) Not particularly the Google Classroom, since we're still writing on a piece of paper and only use Google Classroom to upload the assignments.

#### Student IV

- 1) Yes, I have used the application to study before but not Google Classroom, I use Canva students. Usually check Google Classroom if you want to do assignments or on the day you learn paragraph writing
- 2) In my opinion, using Google Classroom is very helpful because one classroom for one course makes it easy to find previous material, not mixed with other course material, because I am another type of person who likes to collect material per course in one file.

- 3) Yes, of course there is a difference. As I mentioned earlier, it is easier to search for material to keep track of the tasks. You don't need to write as much as possible, just type and click submit assignment.
- 4) For the benefits, I think it is more to facilitate students and lecturers in the interaction and task problems. And to increase my interest and motivation in learning I feel normal
- 5) In my opinion Google Classroom has the effect of improving its ability and skill in writing, because there after uploading assignments, our assignments can be directly commented on by lecturers and other colleagues.

#### Student V

- 1) Yes I have learned to use an app before. Maybe twice a week I log in and check my Google Classroom page.
- 2) My opinion about learning using Google Classroom app makes easier for me to send my assignments to lecture without going through face to face meetings.
- 3) There are some differences when using the Google Classroom application by not using it the first if I use the Google Classroom to make it easy for me to collect the task next, when I upload my writings then mistakes occur lecture immediately give me a response or comment to my writing and if I don't use the Google Classroom app I

have to spend a lot of time collecting assignments and asking for responses because I Have to meet the lecture face to face.

- 4) The benefit of using Google Classroom is the save of time, increasing student communication with lecturer and the quick and easy setting process.
- 5) And yes it increase my interest and motivation in learning. Yes I think the use of Google Classroom improve my ability and skill in writing because there's always a direct comment from the lecturer.

#### Student VI

- 1) Yes, I have before, when getting an assignment or notification from the lecturer
- 2) In my opinion Google Classroom is only an intermediary for lecturers to make it easier to send a material / assignment to their students because as time goes by, the Google Classroom is more efficient in sending material / assignments.
- 3) In my opinion the difference is that I don't feel it is complicated when I get a written assignment, I have to pick up stationery etc. But when you get an assignment from Google Classroom under any circumstances can be directly done.
- 4) So far, the benefits I feel are that it makes it easier to do the assignments wherever you are and not feel motivated.

- 5) Yes there is a slight increase. Like sharing experiences or materials that have been taught by lecturers through the blog that I have

#### Student VII

- 1) Only this semester knows about this application, usually once a day, because if there are assignments and there are other courses that use the same application
- 2) In my opinion the application is good, the application is lightweight, unlike WA which is free to chat, here it is more quieting and more organized and the lecturer can manage it easily.
- 3) The difference is that the lecturer is easier to provide material and questions, students are easier to collect assignments rather than having to print here and there.
- 4) The benefits, as I mentioned above, make it easier for lecturers to deliver material, arrange assignments, and make it easier for students to collect assignments, without having to face to face with lecturers or print outs. A little added interest too, because I'm testing also for this application in learning methods with media.
- 5) Only a little, the difference here is only the typing speed and connection only. Maybe a little increase in writing skills, but not too big impact

#### Student VIII

3. Menurut saya bedanya adalah.saya merasa tidak dipersulit.ketika mendapat tugas secara tertulis, harus mengambil alat tulis dll.tp ketika mndpt tugas dr gugel clsroom dlm keadaan apapun bisa langsung dikerjakan.
4. Sejauh ini manfaat yg saya rasakan adalah mempermudah mengerjakan tugas yg diberikan dimana pun kalian berada dan tidak merasa termotivasi.

~wedding~

Wedding is defined as a legally accepted relationship between a woman and a man in which they live as husband and wife. It is an interpersonal relationship with governmental, social, or religious recognition, usually basing on a solemn contract. There are many reasons for people to marry, such as love, matchmaking, social and economic demands, etc. True wedding in people's mind is based on a loving relationship between a man and a woman in which they publicly promise to live together for better or worse, for richer or poorer, in sickness and in health until death do them part . Wedding not only brings two people together but also holds two families together. Wedsing is not just resulted from love between two individuals. A successful wedding is like a good recipe whose main ingredients, besides love, are commitment, understanding, concern and loyalty. If you can include these aspects in your married life, you can find happiness in your wedding.

You should write about a unique wedding tradition, e.g. Banjarese wedding, or Javanese wedding, not about wedding in general
