

CHAPTER V

CLOSURE

This chapter presents the summary of this research, the conclusion of overall view of what has been Discussed in the previous chapters, and some suggestions that hopefully be useful and give additional input in the teaching and learning English, especially writing.

A. Conclusion

The research conclusion according with the data presented, which have been analyzed in the previous chapter. Investigation and discussion of the result of the research aims to answer problems and results from a research has been conducted, then interpret the finding in the research to be knowledge. From all the analysis of data about autonomous learning using mobile application at vocational high 1 Barabai, it can be concluded that:

1. Applications used in learning English used by students of class IX TKJ SMK 1 Barabai there are three types, namely Doulingo, English Speaking and Listening and Hello English.
2. Students select applications according to their needs. According to the goal of the English lesson.
3. Mobile phone make students feel challenging and interesting in studying English. Also help students being autonomous learner and help students searching the material for the lesson.

B. Suggestions

From the research conducted, the authors have several suggestions that if they can improve learning and have a positive impact items, namely:

1. The teacher is expected to master technological developments that are relevant to the guidance of the community and the development of the times and have the skills on how to use the media so that the learning process more effective Becomes.
2. The teacher more pay attention with the mobile application for individual learning that used by students.
3. Students pay attention with the application that can be used on individual learning.
4. As students make-lecturers as role models and examples in the future.
Because we are students of the MT and Teacher Faculties, who will become teacher in the future.
