**Keywords: Dynamics, Achievement, MTQ.**

Banjarmasin delegations successfully achieved 1<sup>st</sup> place in *Musābaqah Tilāwat al-Qurān* Provincial Level of South Kalimantan and defended it for four consecutive years (2017-2021). This research aimed for knowing the dynamics of Banjarmasin delegation achievements at the provincial level of MTQ from 2012 to 2021, and finding the factors that cause the dynamics of those achievements. This study is a qualitative historical study in which data sources come from the MTQ documents or archives since 2012, accompanied by interviews of historical people who are then described as narration. The result shows that the achievements achieved by Banjarmasin delegations are fluctuating in terms of their accumulation points from 2012 to 2016 and increasing in 2017-2021. These championship points are a result of an accumulation of individual championship points from each branch of the competition and are not tied to a single course. The factors that cause these achievements come from internal and external. Some internal factors are the quality of participants, government facilities, intense coaching, great coach, and official solidarity. Therefore, the external factors that come from the LPTQ regulations, the judges and their rights, and the tough rival of competition will affect the dynamics of the Banjarmasin delegation's achievements. This achievement means that the Banjarmasin city government has more attention for the development of the Quran.
