

## CHAPTER VI

### EPILOGUE

#### A. Conclusion

Based on the data, the author concluded that:

1. The achievement of the Banjarmasin delegation fluctuated in a decade (2012-2021). Fluctuation means them having difficulties from 2012 to 2016, but the achievement increase in 2017-2021.
2. The achievement of the *tilawah* branch is not always dominating the regional points at the general championship, but the result came from the accumulation of all branches of the championship in MTQ.
3. The internal factors that come from the inner area of the Banjarmasin delegation or the things that can manage by Banjarmasin are the quality of participants, government facilities, intensive coaching with a great coach, and official/committee solidarity.
4. The external factors that come from outside are a competition system and regulations from LPTQ, a personal judge and prerogative by judges, and the tight competition from potential participant makes the results of the competition moving up or down from year to year.

## B. Suggestion

Based on this research, there are several suggestions that the author will convey, including:

1. For LPTQ of Banjarmasin and LPTQ of South Kalimantan, it is advisable for keeping the documents as the result of MTQ or anything that related to MTQ and archived it in one place properly. Due to the evidence of the MTQ implementation, is a historical record for the region where the development of al-Quran can be studied more through these documents.
2. For the participants of *Musābaqah Tilāwatil Qur`ān*, it is advisable to continue the exercise and develop the talents and potentials that exist as one of the efforts to study al-Quran. Learning al-Quran is not only because of MTQ but also because anything that has been working for MTQ is always applied to everyday life. Because that is the goal of this event, is to get used to the community to live together with al-Quran.
3. For academics, MTQ is a great activity with wide coverage. There is still much to learn from MTQ like the competition branch, assessment method, and the community's response to al-Quran through MTQ. In an aspect, the study of al-Quran is not limited, and MTQ is one of the new trends in the study of al-Quran.
