

CHAPTER V

CLOSURE

A. Conclusions

1. The steps for applying the *Super Tahfîz* method at SD Islamic Bilingual Science Martapura

Sekolah Dasar IBS uses the *Super Tahfîz* method in memorizing the Qur'an. All students are required to memorize at least one of verse every day. After each complete memorization of one *sûrah*, it will be *muraja'ah* repeatedly until fluently. If it is fluent, then the teacher adds new memorization. The target of memorization in this school is not too much, because the time is used more for *muraja'ah* than added the memorization. The application of the *Super Tahfîz* method at Sekolah Dasar Islamic Bilingual Science has been effective. The fitur special of this method which uses the *taqti'* system is: cutting the reading of the memorized verses of the Qur'an according to the sound or reading not to syllable.

2. The problem of memorizing the Qur'an at SD Islamic Bilingual Science Martapura

In the memorization process, of course, it cannot be separated from the accompanying problems, the problem is divided into two: Internal and External.

- a) Internal Factors

- 1) Each student's intelligence different

- 2) Boredom in memorizing and feeling lazy to *muraja'ah*
- 3) Incompetency of reading and writing the Qur'an
- b) External Factors
 - 1) Less of the teachers
 - 2) Parents fully hand over rote guidance to the teacher
 - 3) The circle friends of children who do not come from *Tahfiz* Elementary School.

B. Suggestions

1. For further researchers, the results of this research can be used as material for comparison and research references as well as consideration for further deepening to research with different aspects.
2. To students always be enthusiastic in learning to read and memorize the Qur'an, and be diligent in repeating the memorization so that are maintained in their memories.
3. For the teachers to always guide students in memorizing the Qur'an, because with the guidance of a teacher will be able to help students in the memorization process
4. For parents to always pay attention to their children, because prayers and support from parents are the most influential among others.
