

CHAPTER V

CLOSURE

A. Conclusion

It can be concluded that mostly the teachers feel that online learning is not always effective especially during this pandemic. It is based on their experiences when teaching through online during this pandemic that mostly teacher can only give material from youtube and assignment which this method has done repeatedly, they cannot do real-time online meeting due to internet quota which is limited and expensive, and also the network problem which being the main problem in this online learning. Because of that, the students fell bored which made the learning not effective.

B. Suggestions

Based on the results of the research, the researcher tend to give some suggestions, such:

1. For the government, they can give some seminar for teacher about technology and how to teach online effectively during this pandemic. So, they can teach more effectively and the students not feel bored when learning online.
2. For teachers, they should have better understanding about technology and utilize the use of technology more effective in example like using duolingo for teaching vocabs or some easy quizzes so the students don't feel bored.
3. For next researcher, the researcher know that this research is far from perfect, thus, the researcher need deeper research about this topic.
