

## **CHAPTER V**

### **CLOSURE**

#### **A. Conclusion**

Based on the findings and discussion, researcher can concludes that there are many important points in implement character building in online class

1. The efforts made by teachers in the application of online character building. There are 7 values that can be applied. Such as, religious, honest, disciplined, tolerance, creative, communicative, and responsibility.
2. The obstacles faced by teacher in addition to difficulties in applying the values of character building, there are also factors from the environment, customs or habits, heredity, and instincts.

#### **B. Suggestion**

Researcher wants to give suggestions about implement character building in online class, there are:

1. The Teacher

Teachers who have implemented character building are expected to never get bored to continue implementing it. Teachers should also set a good example in applying character building so that students can apply in their activities, both in the teaching and learning process and in everyday life.

2. Teacher and students

Teachers and students must complement each other in the implementation of character building, because if only teachers apply without reciprocity from students then character education will not be able to run well.
