

CHAPTER V

CLOSING

A. Conclusion

1. According to the research findings and discussion there are several Advantages and Disadvantages of Used YouTube:
 - a. Advantages
 - 1) Presenting learning resources that are interesting and not boring, 2) Flexibility in used both inside and outside of school, 3) Provides a lot of additional information that can be accessed for free, 4) Can be used as practical exam material for teachers
 - b. Disadvantages
 - 1) Some Of The Video Doesn't Provide Exposure To Authentic English And Offers Authentic Examples Of Everyday English Spoken By The, 2) There Is A Risk That Students Will Lose Their Focus In Learning If There Is No Accompanying Teacher In The Used Of Youtube.
2. Based on the interview transcript, although there are still many shortcomings from the student's, but most of the students have good perspective of used YouTube as a learning medium in the classroom.
3. After observing, the researcher concluded that the used of YouTube in the classroom greatly influence the online learning process. YouTube as a technology can make it easier for students and teachers to carry out the learning process in the classroom.

B. Suggestion

The success of teaching does not depend on the course program alone, the more important thing is how the material is conveyed by the teacher to his students. Responding to this, the teacher can use various media to manage the class to make it more comfortable and related to teaching speaking, namely by using video material from YouTube. Based on the things above, the researcher proposes the following suggestions:

1. Teachers are expected to have more frequent interactions with their students because this greatly affects teaching activities in the classroom, with the presence of a teacher social figure in the classroom the students will feel safe and easier to manage their lesson.
2. For students, researcher advises the students to be more active in class, if the students are afraid to ask questions in class, please ask the teacher during free hours or maybe have a private chat at the right time and condition, by asking the students will get material that they need.
3. For the next researcher, the result of this research can be used as reference, also can be applied in real classroom as long as it is still possible to use.
