INTERVIEW

- 1. What you prefer to choose between synchronous ans asynchronous elearning?
- 2. Why you prefer to choose that ?
- 3. Why do you think that synchronous/Asynchonous e-learning convenience for English education.
- 4. Why do you think that a/synchronous e-learning demands a high speed internet connection
- 5. Why do you think that a/synchronous e-learning offers student complete control over their learning.
- 6. Why do you think that a/synchronous e-learning lacks instant feedback
- 7. How the a/synchronous e- learning helped you to improve your English
- 8. Why you think the most helpful activity is a/synchronous learning

Name : SN

Class : D

Semester: VII

Respond

 I think its convenient cause the synchronous e learning its real time learning like gmeet, zoom etc. so we can asking and get the respond from the lexturer at the time.

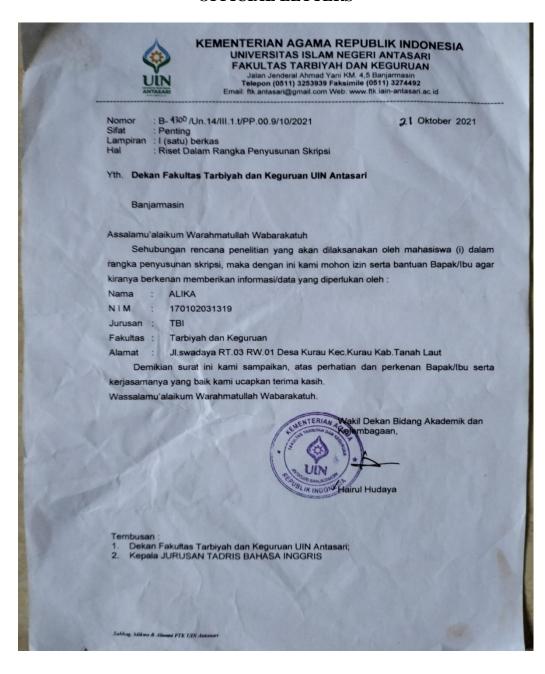

- 2. To be honest I think when teacher give the material without the explanation for any reason I have difficulties to understand I think its not effective
- Because to use the application like video conference its need a good connection, if the connection bad the video will unclear and disconnected.
- 4. Number forth I think for the example like if we just download the file its don't need much data internet and we can open the file whenever we want.
- 5. Number fifth cause its online learning but not real time like video converence. So its up to us when we want to access the material as long as according to the time given by the lecturer. The lecturer can't control us like offline learning cause the lecturer can see us like in video converence
- 6. Number sixth I think if we just read the material without asking the lecturer, we don't have the feedback.
- 7. Number seventh I think 30 minutes its long enough for learning, especially if the lecturer have much explanation than asking the student of the material, sometime the material looks like difficult and the lecturer explanation not on point, I think its better to take a

little time but the explanation its clear and on point and easy to understand.

- 8. Im taking from my friend experience, they use google classroom application, if they want to share material or assignment they just share it on colom coment, its like smalldiscussion its more comfortable for me
- 9. Number nine its more flexible than use video converencing cuare we can access anytime anywhere .
- 10. Every student has different habis some of them lazy or forget to open again about the material, or they forget whre the file saved. Saving a lot a file it use a a large storage
- 11. Caure the interaction face to face the student more convenien cause can asking teacher at that time and lecture can control the student althougt not like offline learning
- 12. Number 12 if we don't have high bandwidth we cannot join the video converence, like zoom and google meet and we can get the explanation clearly
- 13. I don't have specific reason I think both of them completely each other as a facility of online learning.
