Selective	conversation	
	Monologue	
	Story	
	Conversation	
Extensive	Listening for the gist	
	The main idea	
	Making inference	
	Communicative – stimulus response	

Questions Sheets

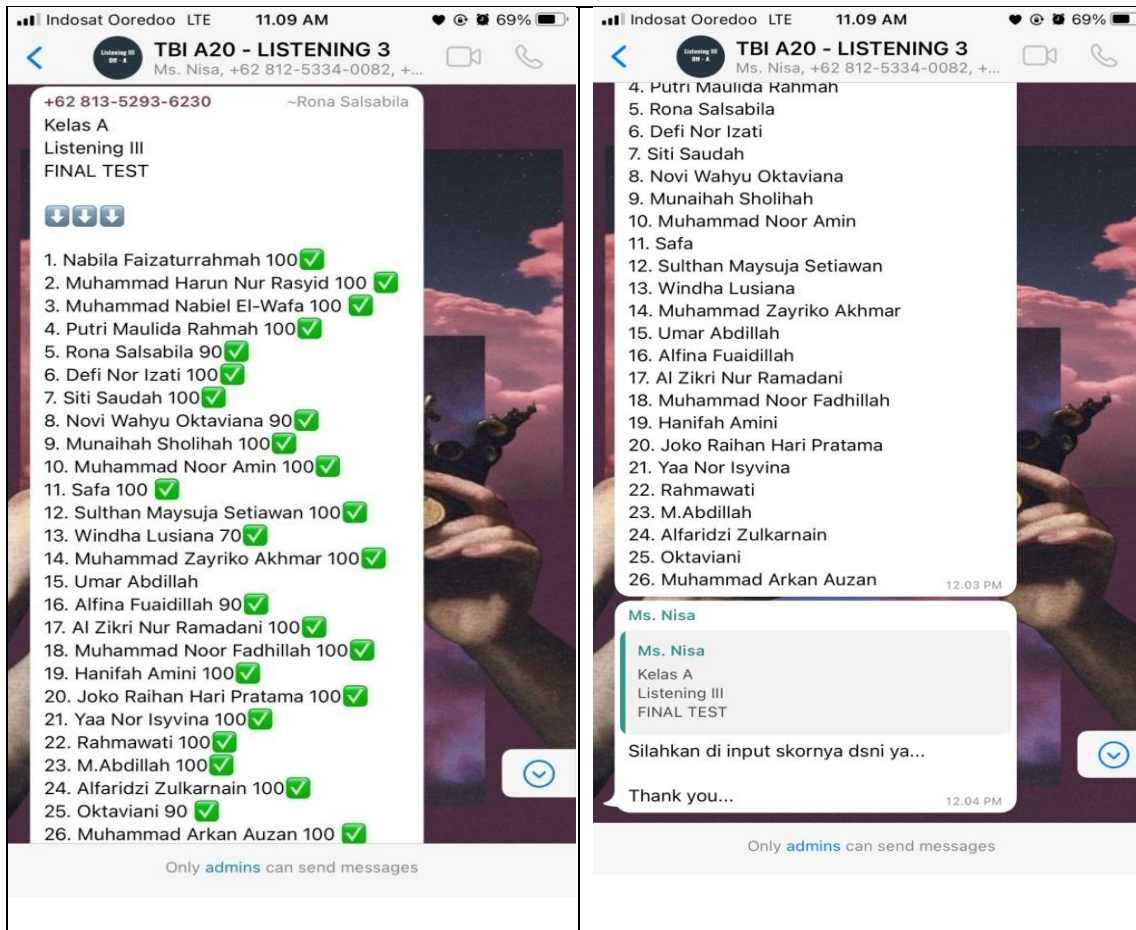

No	Question	Answer
1	What do you think about online learning?	In my opinion the current situation requires online learning because of the pandemic in Indonesia and the government obliges to work from home. There is no difference between online and offline learning, the most that learning goes well in order to get good grades also different only in situations and conditions.
2	How are you perspective about assessing listening during online learning? There any different than offline learning?	There is no difference in my way of measuring listening in online and offline learning, in my opinion. Only the situation is different.
3	What do you think about the results of scores in listening subject during online learning?	Online learning is less fun than offline learning because some students' abilities are less visible when they are online. For example, consider vocabulary. Some of them also have faulty connections, causing the audio to stutter, thus making it more difficult

		for vocabulary-deficient individuals to complete their sentence, compared to those with large vocabularies
4	How about your student activity during online learning?	Because it is difficult to get students to actively participate in this online learning process, they are less active.
5	How about the delivery of material during online learning, does it run smoothly?	This same distribution of learning material runs smoothly during online learning. With the exception of students who have a poor internet connection, they will be late in downloading the material in file form.
6	Have you and your students ever had difficulty with internet quotas, storage software, and internet access during online learning as well as how do you fix and deal with these obstacles?	When online learning was originally introduced, there were issues with the size of the material files as well as internet access for students with limited access. The file size has been converted to link for issues, however some are still in the form of a file but with a smaller file size so students do not have to wait long to download the file. Because the internet network is on the students'

		<p>devices, I have no control over it. Fortunately, we do not perform or submit assignments when the network is down.</p> <p>Right now it is primarily about students' inconsistent internet network connection.</p>
7	Are you a lecturer who has positive on the future of your students so that they will become successful people, with ethics, knowledge, and skills?	Yes. I believe my students have a bright future, broad knowledge, good skills and good ethics
8	Will you ignore if your students do something negative or wrong?	<p>I ignore. Because there was one student who was absent more than a predetermined limit.</p> <p>However, it was my fault that I did not speak directly to the student in question, instead I asked his classmate about attendance in another class.</p>

Appendix III

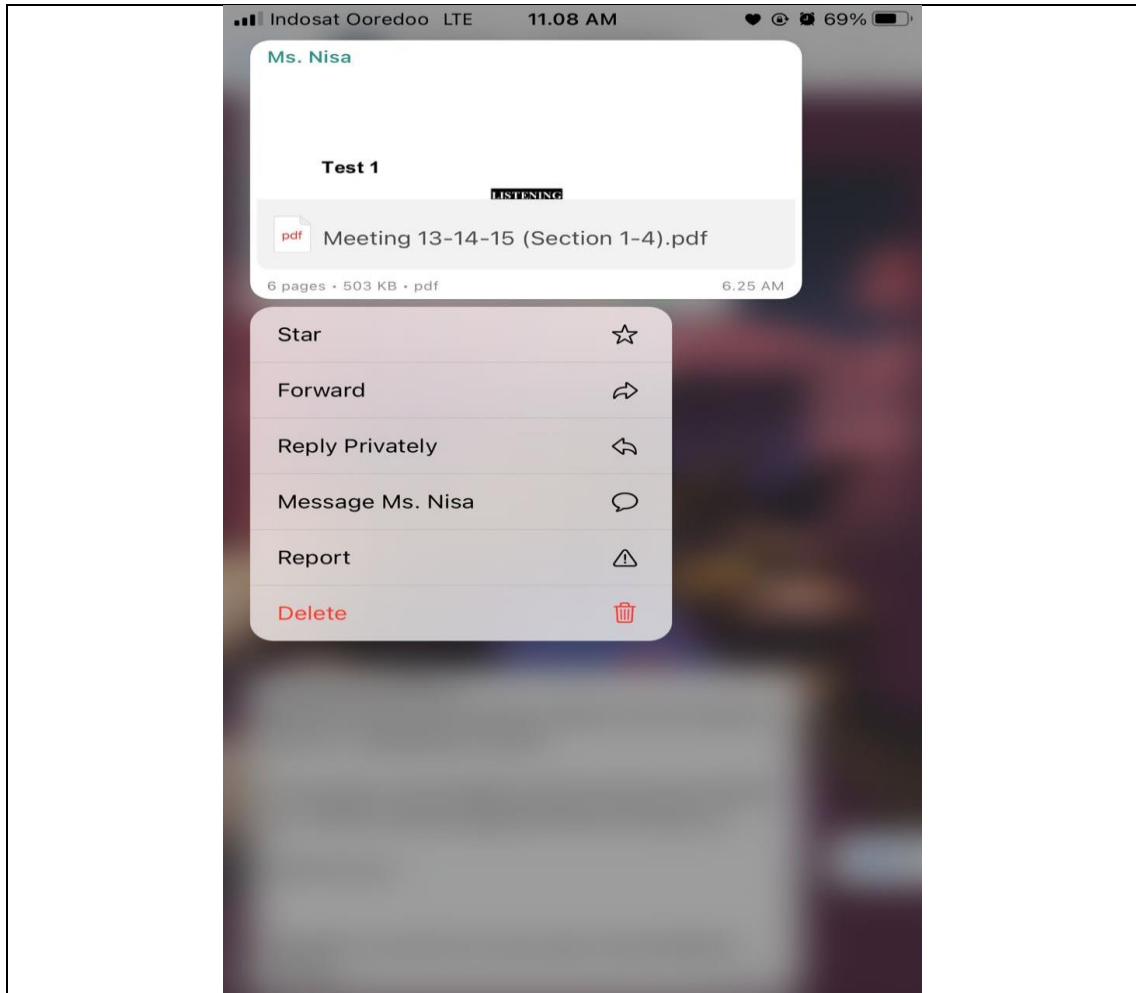

Attendance When Lecturer Will Conduct the Final Test

Opening Sentence before Online Deployment Begins
