

CHAPTER V CLOSURE

A. Conclusion

From the discussion that explained in the previous chapter, the researcher draws some conclusion as the result of exploring english educational content on instagram account by @speakenglishwithmish to enrich learners' english skill. The researcher found the conclusion as follow:

1. There were several English skills and aspects that can be learned or trained from videos. These skills and aspects are: Listening skill, reading skill, speaking skill, writing skill, pronunciation, spelling, grammar and vocabulary.
2. There were 164 videos for learning listening skill and increase vocabulary, 139 videos for learning reading skill, 14 videos for learning speaking skill, 30 videos for learning writing skill and motivate learners to write in english, 50 videos for learning pronunciation, 21 videos for learning spelling ,and 45 videos for learning grammar.

From the results of the interview with 5 followers, skills that can be learned from the English educational content video: listening skill, reading skill, speaking skill, writing skill, pronunciation and increase vocabulary.

And there were several activities using instagram features that can improve English skills such as: instastory feature, IG-Live, Reels, post photo or video, comment and caption.

3. There were 6 benefits of learning english through social media instagram: developing listening skill, developing reading skill,

developing speaking skill, developing writing skill, developing pronunciation and increasing vocabulary.

B. Suggestion

1. For Teacher

It is important for teachers to use different media to teach English and be aware of the development and progress of technology, and the use of social media as a learning media to make teaching and learning activities more interesting, easy to understand, provide more knowledge about English learning from other sources and can increase the interest of learners or students to learn and increased knowledge and skills of English.

2. For Learners/Students

It is important for the learners/students to know about the use of Instagram for learning English and improve the English skill. So learners or students can follow Instagram accounts that contain English learning videos, access useful content and better use Instagram and its features for English learning activities.

3. For Next Researcher

This research can be a consideration for the next research. The next researcher also can look for a gap between this research and the next research to become new topic of the research related to English educational content video.
