

## CHAPTER V

### CLOSURE

In this chapter researcher would draw conclusions according to the findings of this research and there are some suggestions related to this research.

#### A. Conclusion

Related to researcher object of this study there are some conclusions as follows:

1. There are three stereotypes that leads to male (assertive, aggressive, dominant) and seven stereotypes that leads to female (loving children, emotional, sensitive to the need of others, fashionable, weak) which appeared in character' utterances in the "*The Intern Movie (2015)* by *Nancy Meyer*". This result shows stereotype that leads to female appeared more than the stereotype that leads to male in personal traits aspect.
2. The stereotypes about gender exist through character utterances, in another word gender stereotype comes from society through languages when people expressing their opinions or thoughts about others. The researcher defined the meaning of gender stereotypes according to considerations of contextual interpretation from the characters' utterances from the movie.

3. Then, the last conclusion is there are five issues caused by gender difference which are gender stereotypes, marginalization of gender, subordinations or discrimination, gender violence and double burden.

## **B. Suggestion**

This research may far from perfections, but the researcher would like to deliver some suggestions so that the next researcher that has interest in similar topic will get clearer visions about the study.

### **1. For English Education Department**

Sociolinguistics is important to consider as one of the topics discussed according about stereotypes, because the students from this department will be and have become part of society. This aims to discuss issues in society that carry through language, so that students will have the provisions to prepare themselves to be wise in dealing with this issues.

### **2. For English Students**

As the students of English Education Department that learned about language, they should have awareness about languages and phenomenon that caused by language such as gender stereotypes because these would lead to some troubles. According to the findings' analysis, researcher learns that those stereotypes could cause injustice and even discrimination. The researcher would like to suggest to them for bring up about this topic

to be discuss so people would recognized about gender stereotype so that it would help decrease problem in society such discrimination in workplace and others.

### 3. For the Next Researcher

Sociolinguistic has very wide topic to be discuss, but if there are researchers that interested in similar topic researcher suggest that for considering to study more about the impact of this language issues in real life.
