1	What is the brief history of the establishment of this school?	SMPN 2 Kuripan is a school that was established in 2002 and is located in South Kalimantan province, Kuripan sub-district, Asia Baru village. At that time, there were only three active teachers and many inadequate facilities. However, over time, the number of teachers teaching began to increase, and school facilities were able to develop for the better. In addition, students at SMPN 2 Kuripan are students from graduates of the Elementary School of Jarenang (SDN Jarenang) and Elementary School of Asia Baru (SDN Asia Baru).
2	How long have you been the head of this school?	I have served as principal for two years.
3	What efforts are made by schools to improve the quality of education?	In order to improve the quality of SMPN-2 Kuripan, there are several plans that are currently being carried out or will be carried out in the future. For now, the school is developing religious fields such as the construction of a prayer room. Also, repairs will be made to the school field, which will be used for activities and events at school. In addition, the school has plans to build a monument and school fence. Lastly, there is a plan for development in the field of fisheries by utilizing a school environment adjacent to a swamp.

1	What do you think about using the Padlet application during the learning and teaching process?	In my opinion, this application is beneficial in preparing material. In addition, the features and formats in this application can make the material more interesting.
2	How is the students' ability in learning English, especially in vocabulary skill when using the Padlet application?	After several times using this application during teaching, students become more interested in the class lessons. This application also improves the ability to remember the vocabulary taught. However, the increase in vocabulary skills was not very significant because students' interest in learning English was still weak.
3	Do you often use the Padlet application in every lesson?	I don't use the Padlet application very often during teaching because there are some materials that don't need to be used. I only use this application when the material being taught is suitable.
4	What are the benefits or conveniences that you get when using the Padlet application with the Padlet Wall format during the teaching and learning process?	In my opinion, the benefit of using the Padlet Wall format during teaching is that it makes it easier to deliver and create material. I don't need to look for suitable images or videos in other applications because there is already a search engine feature that can make it easier for me to find images or videos that I can use while teaching in class.
5	What are the obstacles you face when using the Padlet application, especially with the Padlet Wall format, during the teaching and learning process?	There are two problems that I encountered in using the Padlet Wall format. First, the arrangement of the materials that I have made there is a bit random, so students find it difficult to see the order of the materials. Second, this application requires a stable internet connection so that images or videos that have been uploaded on the Padlet Wall can be loaded. However, during the learning and teaching process, the internet connection in this area is not stable, so I have to refresh the page so that the pictures and videos can be loaded.
