

CHAPTER V

CLOSURE

The researcher presents conclusions and suggestions in this chapter. Conclusion supports chapter IV findings and discussion, answering the research question.

A. Conclusion

Based on the discussion, the findings of the research can be divided into two main points:

1. The quizizz are used in teaching vocabulary in having the presentation (lesson) of the material, in conducting the evaluation (test), and in delivering quiz (games) for the students. Quizizz is used in a variety of ways in teaching vocabulary. Not only to make learning in a quiz (games) way, but it turns out that quizizz can also help to evaluate (test) students and make material (presentation) in teaching vocabulary. Various variations in the form of using quizizz can make students more active and enthusiastic in learning. It can also make students happy and motivated in learning vocabulary. Quizizz is effectively used in teaching vocabulary.
2. The students` response about the use of quizizz in vocabulary learning was positive. Quizizz provides many benefit for students. Students are fun and joyful when learning vocabulary using quizizz. Quizizz can help students to more interesting and motivating in learning. The use of quizizz can help

students to increase vocabulary. Quizizz also effective used in teaching and learning vocabulary. The students claim that the problem in using quizizz was only the internet connection but it can be overcome by the students.

B. Suggestions

Considering the conclusion above, the researcher proposes suggestions for teachers, school, and future researchers based on the findings of the observation and interview:

1. For the Teacher

Quizizz can use in a variety of ways in teaching vocabulary, quizizz can use in delivering quiz (games), conducting test (evaluation), or having lesson (presentation). Quizizz also gave many benefit to students so they can more active and motivated in learning. In addition, the teacher are expected to use media in teaching vocabulary so that students can more active, interesting and motivating in learning.

2. For the School

Through the results of this research, quizizz gave many benefit for students. It is hoped that the school will further improve school facilities. The school can help learning process by providing wireless fidelity (wifi) or computers (devices) so that students who have problem with the internet connection or don't have devices can access quizizz easily.

3. For Future Researchers

The quizizz was used by teacher in teaching vocabulary has many benefit for students and easy to use. This research only focus in teaching vocabulary. To other researchers who want to conduct the research about quizizz, they can focus in other skills (speaking, listening, reading, writing or grammar). The researcher should be more creative in designing/using various quiz, presentation, or test so that the students have more opportunity to learn in interesting way. Last, it is important to make sure that all of the equipment and internet connection to use quizizz work well before using it.
