

CHAPTER I

INTRODUCTION

A. Background of Study

God not just created humanity in this universe, but also a large range of languages. Thereby, people have accessibility to interaction in their everyday life. Because God created human lives like a gift, we must be thankful. Talk about the impact of languages in the way of the following verse as from Al-Qur'an, Q.S. AR-Room 22:

وَمِنْ آيَاتِهِ خَلْقَ السَّمَاوَاتِ وَالْأَرْضِ وَاخْتِلَافَ أَلْسِنَتِكُمْ وَأَلْوَانِكُمْ إِنَّ فِي
ذَلِكَ لَآيَاتٍ لِلْعَالِمِينَ

One of the most important languages in this world is English, because it is used for Universal language. The United Nations, international events, international media, and other official gatherings involving numerous nations throughout the world all use the English language. Many people are motivated to learn English.

In Indonesia, English is very much taught and learned in school, university and homes too. So, this is where students need something that can help them learn English outside the classroom with the right technology so that students can understand and study English more easily and be able to explore more material outside the classroom.

Technology is a really important in assisting learners in comprehending the lecture especially in English learning, all sciences such as science and technology in the world as well as the heaven are established in the holy Quran, Allah says in Al-Qur'an Q.S. AR-Rahman verse 33 as follows:

يَا مَعْشَرَ الْجِنِّ وَالْإِنسِ إِنِ اسْتَطَعْتُمْ أَنْ تَنْفُذُوا مِنْ أَقْطَارِ السَّمَاءِ وَاتِّ وَالْأَرْضِ فَانْفُذُوا
وَإِن لَّا تَنْفُذُوا وَنَ إِلَّا بِسُلْطَانٍ

Technology is built on this verse, Allah stated, science is really very essential to humanity. Through science, individuals have the ability to do anything. Allah created humanity given intelligence. Honest intelligence must be improved by working and studying. In furthermore, Allah had explained to humans and jinn that even though science and technology could access the heavens and the earth, its ability to achieve this is limited by the lack of Allah's permission because no force is capable of equalizing the power of Allah.

Today's advances in information and technology (IT) may be the answer to such issues. Technology advancements appear to have a lot of beneficial effects on schooling. Students can choose from a variety of engaging learning resources thanks to technology. YouTube is one of the technical advancements that can be used as educational material. Everyone has access to this program anytime, wherever. Youtube can aid language learners in developing their language abilities, particularly in English. (Kristiani & Pradnyadewi, 2021)

If students want to experience something new and different, learning English outside of the classroom can be enjoyable. Students can enjoy their studies and get higher results. Utilizing YouTube outside of the classroom refers to using English to help students achieve their own objectives rather than just studying more. (Tantarangsee, 2016). When students learn English outside of the classroom, they may focus on developing their language abilities since they can access any type of media or material and learn in their own way.

There are four English Skills to students learn, namely: Listening, speaking, reading, and writing skill. The four skills are supported by the learning of language aspects. Listening is a skill that focuses on hearing which is usually in the form of video or audio that has sound that can be heard, this is the media used for the listening skill process, speaking is a skill that focuses on speaking English directly with your opponent or other people or practicing on your own, whereas reading focuses more on reading any media with a number of techniques that have become rules in reading itself, and the last from skills is writing is a skill that focuses more on write in learning English which can usually be obtained from any media. So, if you want to learn this skills, you must focuses one by one skill first before learn another skill.

B. Definitions of Key Term

To avoid misunderstanding and miss interpretation to this research, the research needs to feel necessary to define a few terms trying to deal with the title as follows:

1. Youtube

Youtube is an online video sharing website. It was already easy to publish and view videos on the internet, and users can submit their own clips and comment on those of others. (Moor, 2008)

Youtube in this research is the software of Youtube that English students use to learn English as media outside the classroom.

2. English Language

The English language is the one language that really has attracted many individuals worldwide, mostly in part due to globalization. In addition to globalization, the interest through the global trading, scientific resources available in English and advantages as such together with the interest in literature are among the other reasons responsible for the worldwide attraction in learning English language and literature. (Amiri, Lecturer & Branch, 2012)

The English in this research is a language that is usually studied in school. For this research, researchers want to see students learn this language outside of the classroom to understand more widely. English is not just the language learned at school or education language but also for daily life and includes other things.

3. Learning Outside the Classroom

Learning is indeed a process of communication between students, teachers, and educational materials. Learning outside of the classroom gives an invaluable service to teachers and many others. It propels us forward by offering a strong base of concepts that academics, administrators, and others can use as they create their outdoor learning projects around the world, rather than one moment too soon. (Beames, Higgins, & Nicol, 2011).

Learning outside the classroom in this research leads to learning English, especially outside the classroom using a Youtube app media to help students to learn anywhere and anytime. Learning outside of the classroom is more fun because they can learn in their own way and not depend on teachers who teach as in the classroom.

C. Research Question

By conducting this researcher wants to be investigate some problems which are followed as follow:

1. What Youtube channels that the Students use as media for study English outside the classroom?
2. What are the advantages of using Youtube as media for study English outside the classroom?
3. What are the disadvantages of using Youtube as media for study English outside the classroom?

D. Objectives of Study

The objective of this study is to find out:

1. To find out what Youtube channels that the Students use as media for study English outside the classroom.
2. To explore the advantages of using Youtube as media for study English outside the classroom.
3. To describe the disadvantages of using Youtube as media for study English outside the classroom.

E. Significant of Study

The outcome of the study was assumed provide the valuable advantages that really are functional in addition to theoretical, among many others, as follow:

1. Theoretically Significance

The outcome of the study really was required to give the advantages, contribute, and also to give a few informative suggestions for students to use Youtube to support learning English language outside the classroom.

2. Practically Significance

a. For the students

This research is intended to start making it easier for students to learn to get equipment and improve English outside the classroom by using Youtube and students extra manageable themself when learning English.

b. For Researcher

This research is indeed very helpful when used as a reference to keep improving some research.
