

## **CHAPTER V**

### **CLOSURE**

#### **A. Conclusion**

The researcher makes conclusions based on the results of the research on the analysis of translation method in animated series Kung Fu Panda: The Paws of Destiny conclude that the researcher analyses of 4 episodes animated Kung Fu Panda: The Paws of Destiny which available to watch in video streaming service Prime Video by Amazon and found 25 data consist of 1 word-for-word translation, 6 literal translation methods, 3 faithful translation methods, 3 adaptation translation methods, 7 idiomatic translation methods and 5 communicative translation methods.

#### **B. Suggestions**

After the researcher describes the result and conclusions, there are some suggestions here that researcher explains as below:

##### **1. English Department Students**

The researcher hopes this research can as the guideline for English Department Students to learn translation, especially literal translation method as a reference. Therefore, they need to pay attention that the language is dynamic when using literal translation method. In addition, to focusing on lexical accuracy, a good translation process takes into consideration of the target language's appropriateness in terms of meaning, style, and cultural context.

##### **2. Translators**

The researcher hopes this research can be as the guideline or reference for other

translators and they need to focus while translating an animated series, especially using translation methods. In addition, the researcher also suggests that the translators need to develop their insight in translation, specifically for translation method so that produce a good translation result.

### 3. Other Researchers

The researcher suggests for other researchers that they need to notice the result of translation, especially in the translation methods which produced by translators. There are many theories from experts that can be explores by other researcher to analyse about translation methods in animated series and it would be better to read more about translation that related to this research.
