The screenshot displays the homepage of the Indonesia OneSearch service. At the top left is the logo for 'indonesia oneSearch by PERPUSNAS'. The main heading reads: 'The one search service to all public materials from Indonesian libraries, museums, archives, and e-resources'. Below this, there are two tabs: 'Public Materials' (which is active) and 'E-Resources'. A search bar is positioned below the tabs, followed by a dropdown menu set to 'All Fields' and a red 'Find' button with a magnifying glass icon. The background of the page features a scenic view of a volcano at sunset.

The 5 Steps of Google's Semantic Search

Each step leads to a more semantic web

Contoh: Semantic Search

The image shows a Google search interface. The search bar contains the text "how old is ismail fahmi". Below the search bar, the "All" tab is selected. The search results show "About 497,000 results (0.60 seconds)". A knowledge panel for "Ismail Fahmi / Age at death" is displayed, showing the age "75" and the years "1922–1997". To the right of the age is a portrait of Ismail Fahmi. Below the knowledge panel, there are search results for "Mengenal sosok Ismail Fahmi PhD Nara Sumber SLIMS COMMEET ..." and "Ismail Fahmi Profiles | Facebook". To the right of the knowledge panel, there is a separate box titled "Ismail Fahmi" with the subtitle "Diplomat". This box contains a biography: "Ismail Fahmi was an Egyptian diplomat and politician. He served as ambassador to Austria, tourism minister, foreign minister and deputy prime minister. He was awarded to professorship. Wikipedia". Below the biography, there are fields for "Born: 1922, Egypt", "Died: 1997, Cairo, Egypt", and "Children: Nabil Fahmy". There are also "Books" and "People also search for" sections. A red callout box with the text "Fact Extraction" points to the "Born" and "Died" information.

Structured Database

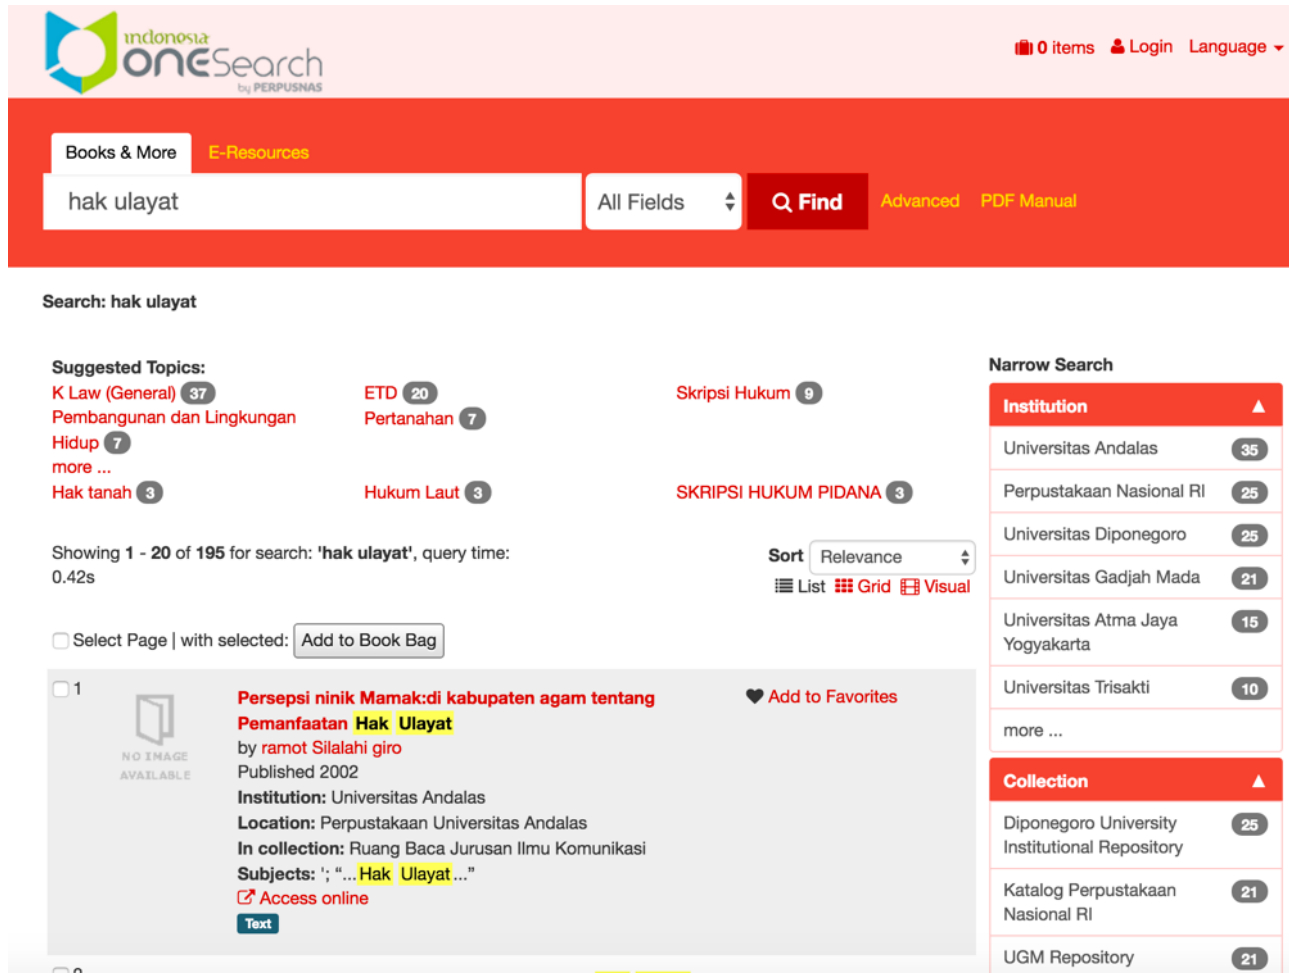

Once structured it can be...

- Integrated
- Queried
