

## BAB V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the research result of Students Problems in Creating Lesson Plans ( A case study at Tarbiyah and Teachers Training Faculty of UIN Antasari Banjarmasin), it can be concluded that there are ten of problems face by students when making a lesson plan, writing lesson plan taught by diferent lecturers, procedure of lesson plan with different curriculum, difficulty in distinguishing between goal and objective, difficulty in making rationale, difficulty in determining the learning method, approaches and techniques, difficulty in making while activiy, difficulty in determining competency standards and indicators, difficulty in determining the materials, and difficulty in making assessment.

#### B. Suggestion

From the research result, discussion and conclusion which is discussed above, researcher wants to give suggestion as follows:

1. Students should learn more about how to prepare the lesson plan either the Curriculum 2013 or *KTSP*.
2. For students, they should be able to practice how to make a good lesson plan and don't forget to analyze the example of the lesson plan given by the teacher or from other examples.
3. Students should be able to distinguish two different curriculum, they are curriculum 2013 and *KTSP*

4. For All lecturers who teach CMD and Instructional Design in particular, should give more explanation. Not only provide examples and tasks, but provide more detailed explanations. Because not all students can receive the material quickly and accurately.
5. The lecturer should be able to improve the students' ability in understanding the curriculum, syllabus and lesson plan clearly and in detail.
