

CHAPTER V

CLOSURE

A. Conclusion

Based on the result of this research about students' activities in learning English outside of classroom. There are some important conclusion that can be presented by the writer as follows:

1. The activity the students do the most is using English setting on smartphone, laptop, etc., while the activity the students do the least is going abroad or a place that use English daily.
2. There are 5 problems the students have in learning English outside of classroom. They are : Lacking of vocabulary, Lack of the ability to speak in English, not confident, do not have enough data, do not have necessary devices like laptop, etc.

B. Suggestion

Related to students' activities in learning English outside of classroom, the researcher want to give some suggestions as follows :

1. For students or people who want to learn English outside of classroom
 - a. Start from the activity that we like. We do not need too focused how to get better in English at first, just enjoy it. Someday we will master English as long as we keep doing it.
 - b. Do not make excuses to learn English like we do not have the time, we have never learn it at school, we do not live in English speaking country, we do not have a partner to practice English, we

are too old, we do not have money or other reasons. In fact, there are many people who can master English even though they do not learn English at their school. The most important thing is how serious we are to English. With our current technology, we can learn English from anywhere and anytime. So, there is no reason that we cannot learn English.

- c. When we do some English activities for example when we listen to English song, if possible do not only listen to the songs, but also pay attention to lyrics, search the lyrics, translate or search the translation of the lyrics, sing the songs, etc. The researcher have included some ways to learn English more effectively in chapter II of this research.
- d. Do not worry when we feel that our English do not improve at all even though we have studied it everyday, while beforehand we can learn faster because that means our English quite good. We have learn most of common words, in order to learn less used words, it usually takes longer time. So, do not worry about it and keep learning.

2. For teachers

- a. The teachers should vary their learning strategies, not only reading and explain what is on the book, but also include many media, like songs, videos, games, etc. So, the students will not get bored.

- b. The teachers should give their students motivation to learn English outside of classroom, not only ask them to read many books, but also ask them to learn from English songs, movies, games, youtube, etc. because many students do not like reading books and reading is not the only way to learn English.
3. For further researcher
 - a. There are still many things that are lacking on this research, the researcher hopes that someone will make a more complete and accurate research.
