

CHAPTER V

CLOSURE

A. Conclusion

Based on the research that was carried out of the Fourth Semester Students of English Department at Antasari State Islamic University Banjarmasin Academic Year 2017/2018, the writer drew conclusion from the previous chapter which had been discussed.

1. the level of students' reading for pleasure habits at Fourth Semester Students of English Department at Antasari State Islamic University Banjarmasin Academic Year 2017/2018 was considered medium category. It can be seen from the average value of the level of students' reading for pleasure habit was 70; it is on the interval 60 – 77.
2. The average value of the students' reading achievement in English learning was 71. So, the reading achievement in English learning was categorized well.
3. In this research, it was found that there was significant correlation and significant influence between the level of students' reading for pleasure habit and the students' reading achievement. It could be seen from correlation result that the $r_{\text{count}} 0,417$ and $F_{\text{reg}} 7,81$. However this correlation and the

influence were enough, which pointed to other factors influencing students' reading achievement.

B. Suggestions

From the calculation above, there are some suggestions that are proposed by the writer:

1. For teacher

Teacher should control the development of students' reading achievement in order to know the students who have less reading achievement, so they can do the remedial test.

2. For student

Students should make reading and learning as a necessity. They should use the time to study in order to develop their achievement especially in reading for pleasure.

3. For next researcher

The writer suggest next researcher to conduct further study that can enhance this research because this research actually can be broaden and extended to other subject and in different setting.
