

CHAPTER V

CLOSURE

A. Conclusion

Based on the research result of Students' Problems in Online Discussion Class Using Canvas Application (A study at *Tarbiyah* and Teacher Training Faculty of UIN *Antasari* Banjarmasin), it can be concluded that there are seven of problems faced by students second semester English education academic year 2017 in online discussion class. The seven of students' problems such as:

1. Lazy in online class.
2. Bored in online class.
3. Problem of Log-in Canvas.
4. Problem of internet onnection.
5. Misunderstand the articles.
6. Misunderstand the question
7. Problem of time management.

B. Suggestion

From research result, discussion and conclusion which is discussed above, researcher wants to give suggestion as follows:

1. Students learn with blended learning should be able to raise the motivation in learning online discussion class.

2. Students must prepare the appropriate facility in online class such as hand phone or laptop and good internet connection.
3. Students must log in the canvas application using email account and always remember the password of email.
4. Students should learn more and understand the material of articles in online discussion and be active to respond in learning online discussion class.
5. Students should be able prepare and manage time for online discussion class.
6. The lecturer should be able to improve the students' interest in online learning and always respond and monitoring students in online discussion activity.
7. The resercher reliazed this research far from perfectness. Hopely to next researchers can develop this research and find another theories in online learning.
