

CHAPTER V

CLOSURE

A. Conclusion

Based on the results of the research, researcher can conclude about Edmodo. Edmodo is an application commonly used for learning. In this study, MAN 2 Model Banjarmasin is one of the schools in English learning, the English teacher uses Edmodo application. Based on the results of the research, the researcher found that the English Language Teacher in this school used the Edmodo application as a tool to provide assignments to students and tools for students to work on or collect assignments.

Beside that the results of the research also found that students in class X Mipa 6 which were the subjects in this research, most students in this class stated that they were happy to use Edmodo application. They also think the Edmodo application helps them in learning, and does not complicate them. However, besides that there are also some students who state that the Edmodo application still has some disadvantages that cause them difficulties in using this application. However, most students stated that they were happy to use the Edmodo application and thought this application did not complicate them.

B. Suggestion

Based on the finding of the research, the researcher would like to propose the following suggestion:

1. English teacher in this school who uses the Edmodo application will be better if using the Edmodo application in the various features available in this application, not just using this application for assigning tasks. But it can also be for discussion forums, upload learning materials, upload student values, and it would be better if the teacher could use this application to teach various skills in English.
2. This school would be better if could support all teachers in this school to be able to use the Edmodo application. So that the teachers and students in this school can learn and teach according to the times at this time, so learning is more varied, interesting and easier for teachers and students.
3. The next researchers will be better if they can examine various learning applications. Because with research on the learning application, we can find out how the application can be used and how various parties perceive the use of applications in learning.
