Teaching English for Children and Adults

89

A-

One of the best occupation is being a teacher. You could be teaching from kindergarten to adult level for EFL (English for Foreign Language). As a teacher you need to be flexible enough to be able to cope in whatever situation you may find yourself. So, if you are a bit unsure about what it will be like teaching the different age groups, here are several differences between teaching children and adults.

Firstly, adult learners are very independent, while children aren't. It is possible to let adults work things out for themselves, organize themselves and even decide the direction for themselves. On the other hand, with children is necessary to be in charge of the classroom, giving clear instructions and dealing effectively with learning resources and classroom management.

Secondly, in terms of learning, children need to be given a wide variety of activities which relate to the different areas. Activities in a young learners classroom should be shared with adults. It is possible to spend more time on teaching so it is possible to engage more deeply with the learning materials.

Then, adults are generally more nervous in the classroom than children. Children seem to have no fear to try anything, as long as they perceive it to be fun. Adults may feel anxious because of the fact that they are not the age of the typical learner.

The next difference is adults are more likely to be more motivated than children. Adults are generally in the classroom they choose to learn English for work or study, which means their motivation levels are naturally high. Children usually have no choice, which means that they may lose enthusiasm if they are not interested in learning English.

Finally, the most difference is that of discipline. Teaching children is all about being able to deal with discipline firmly and effectively. When teaching adults, discipline should not be an issue because they are adults.

Thus, there are a number of differences between teaching English to children and adults. If you bring good communication and authentic language use, utilize your students' previous knowledge and maintain a fun atmosphere in the classroom and you will be successful no matter the age of your students.

## The Danger of Driving Fast on the Street (Effects)

Many people in this country use vehicles so that is definitely related to the road or street. There are people who obey existing traffic rules and there so many people who violate them. One of them is driving fast on the street.

We need to know so many dangers that will occur not only to ourselves but can also relate to other people when we drive fast on the street. These are several dangers of driving fast on the street - for the first, when we drive fast in the rainy season, then most likely what will happen is an accident because of the slippery road.

Second, when we drive fast on the road which is an access to a market or directly adjacent to the market, usually it often a frequent collision because of the many people who carry out activities. And it also could occur in a collision because the market area is usually a lot of goods cars operate.

Then, we don't know whether the road we are running is always smooth or good condition, it could be when we drive fast and suddenly hit a big hole on the road. If we can control our vehicle, damage can still occur to the vehicle itself. But if we can't control it, an accident is likely to occur. Likewise with the drivers who like to drive fast around the corner, there are often accidents due to collisions in the opposite direction.

Thus, that is some dangers that will occur when we drive fast on the road or street. So, drive at medium speed and pay attention to safety and security for yourself and others. Be careful.

Unlike teaching for children who need more instruction and doing effectively with learning strategy and classroom management. The adult learners are very independent. Generally, children have no strong motivation in learning which may be enthusiastic if they are not interested in the classroom. In contrast, adult learners can want things out for them selves, organise them selves, and even decide direction of the lessons. In motivation, adults more motivated than children.
