

CHAPTER V

CLOSURE

This content for this chapter consists of two parts. The first part is about conclusions of the findings that the researcher found in the research and the second part is related to the suggestions that the researcher proposes for the future in the results of research that has been done.

A. Conclusion

After all the data has been examined accurately based on the results of a study entitled *How are students' Awareness in using English on online learning in Senior high school MAN 1 Murung*, the researcher can write some conclusions that can be drawn from her research, The students remain very enthusiastic and excited and also have a tolerance for learning new theories from their second language. So students are said to be very aware of English on online learning and included in 5 (five) domain the scope of Language Awareness there are: The Affective domain, The Social domain, The Power domain, The Cognitive domain and The Performance domain.

B. Suggestion

Based on the findings from the research results, the Researcher wants to propose some suggestions which can later be used as evaluation material and information that can be taken, the suggestions are follows:

1. Teachers always pay more attention to students so that they are aware of English and must have strategies in learning so that students prefer to use English in the classroom or in other places.

2. Students must be aware and active in using English when in class or outside the classroom so that there is awareness of students in using English especially when learning English subjects.
3. Future researchers continue to get broad topic research which is new problems and solutions related to this research.
