

CHAPTER V

CLOSURE

This chapter presents the conclusion and suggestion about the result of the study. The conclusion addresses the answers of research questions in as stated in chapter 1. The suggestions are provided to expect better improvement for lecturers, students, and future researchers related to this field.

A. Conclusion

Based on the research result of the students' difficulties in listening comprehension, it can be concluded that there are some difficulties and the most difficulties that the students encountered. These are:

1. The Difficulties

Students' failure to concentrate, Students' lack of vocabulary and grammar knowledge, Variety accents of speakers, The speakers speak too fast, Unfamiliar topic, Pronunciation, Bad quality recording, and Inability students to apply listening strategy.

2. The Most Difficulties

Difficult to understand the meaning of words which are not pronounced clearly, noises around, poor quality recording, speakers speak too fast, using experience and background knowledge, variety accents, unfamiliar topic, rate of speech, and lose concentration when think about the meaning of new words.

B. Suggestion

Based on the discussion and conclusion, the researcher gives suggestions as below:

1. For the lecturer

The lecturer is suggested to become more aware of the difficulties encountered by the students in academic so that it will find a good strategy to teach in order to make the students become a better listener.

2. For the students

The students are expected to train their listening intensively in order to help them overcome their problems in listening. They also expected to more often listen various accents such as British or American, it can be listened by watching YouTube or etc. Furthermore, when teaching and learning process if you don't understand something, ask the lecturer.

3. For the future research

The researcher suggests that there will be future researchers who explore more about students' difficulties and the solution to overcome it.
