

ABSTRACT

Jum'atiah, 2020. *Development of Arabic Vocabulary Materials on Cognitive and Psychomotor Aspects for Students MTsN Banjarmasin South Borneo.*

Supervisor 1: Dr. Ahmad Muradi, M.Ag, Supervisor 2: Dr. Wahyuddin, M.Pd

Keywords: Development, Arabic Vocabulary Material, Cognitive and Psychomotor Aspects

Test is an important part of teachers and students because there are no schools and universities without tests and there is no alternative test to evaluate students objectively. The vocabulary test faces problems, there is a vocabulary test that is difficult in the LKS book used and there is no test material for cognitive and psychomotor aspects.

The purpose of this study was to develop Arabic mufradat test material on cognitive and psychomotor aspects for students MTsN 1 Banjarmasin and MTsN 3 Banjarmasin, to determine the validation of Arabic language experts and Arabic language evaluation experts on the products developed and the characteristics of the products developed.

This research is a research on the development of the Sukmadina into 3 steps, namely 1) preliminary study, 2) model development, 3) model testing.

This research produces a product in the form of Arabic language mufradat test material on cognitive and psychomotor aspects for students of MTsN 1 Banjarmasin and MTsN 3 Banjarmasin. And the results of the Arabic expert validator with a value of 90%, namely the product developed is suitable for use and according to the Arabic evaluation validator with a value of 80%, the product developed is suitable for use.
