Keywords : Analysis, Referencing style error, Theses

In the technique of writing book or scientific works, accurate information is needed to support the contents of the book. This information can be found in various forms, either through printed books, websites, or various information from printed and digital media. We can refer to all these references as a list of references or read recommendation. In intellectual activity, a list of references is used as a source of information to support the writing of scientific works and various forms of writing. If a scientific work does not have a bibliography, it will be doubted about the truth. In writing of reference list there are many style was used. One of referencing style used is APA style. APA stands for American Psychological Association, so APA Styles is one of the reference styles issued by the APA organization, especially for the fields of psychology, education, engineering and business. Therefore, in this research the writer analyzed the error in writing reference list according to American Psychological Association Style.

The problem statement of this research is what are the referencing style errors that written by students in thesis references?. The subject of this research is students theses of English Department. The researcher collected data by taken from library of university the thesis reference and read their thesis references. After collected the data are analyzed the referencing style and referencing style errors created by students with theories and explained descriptive-qualitatively. The result of this research the writer finding the referencing style error at writing of authors name, website, punctuation and capital letter.
