C. Data Presentation

This subchapter presents the data that have been collected in the research. The writer gave the written test to the second grade students at Islamic Senior High School Siti Mariam Banjarmasin on June 3rd 2009. The written test contains 50 questions; the questions are divided into three parts. First, the multiple choice test with four options. Second, completion test with fill in the blank according to the picture that have decided. Last, completion test with fill in the blank according the correct verb that have decided in the box. It was performed for about 90 minutes. The writer did not allow the students to open their dictionary.

After the research has been done through the tests to the students, the primary data about using verb correctly of second grade of Islamic Senior High School Siti Mariam Banjarmasin in academic year 2008/2009 can be presented in the table below:

Table 4.8 the test score of Mastery in using verb made by the second year grade of Islamic Senior High School Siti Mariam in academic year 2008/2009

Number	Score
1	16
2	38

22	55
23	64
24	48
25	32
26	44
27	50
28	58
Total	1060

From the result of the data above, it can be seen that the highest score is 72 and the lowest score is 16

Table 4.9 the frequency distribution of the students score

Number	Score	Category	F	P
1	80-100	Very Good	0	0 %
2	60- < 80	Good	3	10,71 %
3	40 - < 60	Enough	7	25,00 %
4	20 - < 40	Poor	15	53,57 %
5	0 - < 20	Very Poor	3	10,71 %

Based on Data in the table above, it can be accounted that the students' using verb correctly is

$$M = \frac{\sum X}{N}$$

$$= \frac{1060}{28}$$

$$= 37,25$$

It is included in poor category

The last step is classifying the score into the category of qualitative score. The writer categorized the students' score as follow:

Table 4.10 the frequency distribution of the students' score to categories

The result of the test shows that the students' total score is 1060, so the mean score is 37, 25. According to category of qualitative score, it is classified into very high error.

D. Data Analysis

After presenting the data, the writer analyzes all the obtained data that have been presented earlier in this research. The presented data of the test using on the table 4.9, about the Using Verb Correctly of the Second Grade Students at Islamic Senior High School Siti Mariam Banjarmasin in academic year 2008/2009 on the previous subchapter, show that only 0 student (0%) got the very good score. It is included in very small category. The students that got the good score are 3 students (10, 71 %), it is included in very small category. There are 7 students (25, 00 %) that got the enough score; it is included in small category. The students that got the poor score are 15 (53, 57 %), it is included in middle category, and there is also 3 students (10, 71 %) in very poor score, it is included in very small category.

Based on the data, mean of score of the students mastery in using verb correctly is 37, 25. From this case, the writer concludes that the second grade students of Islamic Senior High School Siti Mariam are generally in poor category. According to category of qualitative scores, it is classified into very high error.

From the data, we can see that there are many students got poor scores. Most of them could not use verb correctly, especially in the form of present perfect tense, present future Continuous tense, Past Continuous tense.

Finally, the writer concludes that the students have less understanding of verb especially in tenses. Thus, they effect on the student using verb in using a verb correctly. The result above becomes the evidence that indicate that the students do not reflect a complete verb in tenses although they have learned it.
