

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the findings above the researcher formulate the following conclusions:

1. The research has been successfully carried out and found 11 characters out of 18 described. Those characters consist of religious, discipline, work hard, curious, friendly, creative, democratic, independent, honest, love reading, and take responsibility. These characters are observed through feedback given by students to the creative way learning method.
2. Based on more in-depth observations, the researcher identified the most dominant character was work hard. This character can be seen from the persistence of students to complete their homework and answer questions from their teacher. All these things they try to do even though the location of their school is in a less conducive place.
3. Students stated that the creative way learning methods make it easier for them to learn English. This finding was reinforced by more than a total of students who admitted that learning English was not difficult anymore. Then the creative way method is successful in increasing students' interest in learning English.

B. Suggestion

Based on the finding of the research, the researcher would like to propose the following suggestion.

1. For English Teachers

The creative way in teaching English method can be used as a solution to attract students' interest in learning English.

2. For students

To always be enthusiastic in following English lessons because English is fun

3. For the Next Researchers

Can extend the duration of the study so as to have a wider and more precise observation results. Hopefully this research can be a reference for further research in the future.
