

## **CHAPTER V**

### **CLOSURE**

This chapter presents the conclusion and suggestion of the research that related to Online Learning Implementation to Young Learners Using WhatsApp Application. The researcher has divided the conclusion into two-part. First part is the conclusion. Then, this chapter also presents a suggestion for the teacher and further researcher.

#### **A. Conclusion**

After describing the data in the previous chapter about the implementation ease and constraining of online learning, the researcher can conclude that;

1. Based on the results of the data obtained, it can be obtained that online learning is learning without face-to-face between teachers and students, but is done online or by accessing internet network by using social media to exchange information and interaction by using the WhatsApp group application. Process learning begins at 07.00 WIB, the teacher sends assignments to students then the student's answer is sent via private chat to the teacher and given

time for collecting answers until 15.00 WITA. There is one meeting a week.

2. Ease of online learning, among others, for teachers of student learning outcomes can be known directly, learning activities are not limited by distance, time and place, in the learning process can be accompanied by parents, students can access the internet network, students can take advantage of existing media the surrounding environment, have a lot of time with family, can play cellphone, no need to wake up early, and more playing time.
3. While the constraining experienced by teachers and students include teachers in evaluating teacher learning activities must be more focused and thorough, students or parents do not have an internet data package, it is difficult to understand the material presented by the teacher through online media, the lack of understanding of parents so that they cannot teach their children, the internet network is sometimes unstable.

## **B. Suggestions**

1. English teacher

The researcher hopes the English teacher at SD IT Az Zahra continues to teach the students with enthusiasm. The researcher also hopes that the English teacher at SD IT Az Zahra continues to

learn more about English Teaching, and improve it. Thus, they can achieve their goals teaching their students.

2. The researcher knows that online learning is a common topic for a research. But, the researcher hope the next researcher can find something new from this topic and do deeper analysis and research about online learning. The researcher also suggests to the further researcher in conducting the next research that related to this research with other aspects other than ease and constraining.
