*Keywords: Learning Motivation, Students Package B and C.*

*Learning motivation for students in packages B and C is very important because in this way it can make them want to study at the Banjarmasin City Community Development Foundation. However, their motivation is more focused on the goal than themselves wanting to get a diploma to get a better job. The objectives of this study are: 1) To describe the learning motivation of students in packages B and C at the Banjarmasin City Community Development Foundation. 2) Identify the factors that influence the motivation of students to take part in the learning program packages B and C at the Banjarmasin City Community Development Foundation.*

*The research method uses a qualitative descriptive research approach. Respondents in this study were students of package B and C at Yayasan Bina Warga Banjarmasin, 1 student of package B and 2 students of package C. The technique of collecting research data was by means of interviews, observation, and documentation. Data analysis uses data reduction, data presentation, and inference and verification.*

*The result of the research is that the motivation they have in learning is to get a diploma. Factors that influence the learning motivation of students at the Bina Warga Kota Banjarmasin Foundation include the aspect of themselves and the age of the respondent which makes them lazy in learning, their grasping power is not good in learning so that their expectations are not good in learning and paying attention to lessons. Jobs that sometimes make them busy to earn a living and finally they feel that in learning there is no time to study.*
