

CHAPTER V

CLOSURE

In this chapter, the researcher would like to provide conclusions and suggestions. The conclusion supports the findings and discussion in chapter IV which is the answer to the research question. These suggestions support the importance of the research presented to the parties mentioned in Chapter I.

A. Conclusion

The conclusion of the researcher found out there are six types of strategies used by English teacher. Also, there are one strategy that the most appropriate for online learning.

1. Based on the research that the researcher did on the teacher's strategy in teaching class students VII A, VII B, and VII C, the researcher concluded that there were 6 learning strategies used in the online learning process by 3 teachers involved. The learning strategies are discussion, problem solving, jigsaw, peer teaching, case study, and debate.
2. Based on the results of three English teachers, the researchers conclude that the most appropriate online learning strategy in the pandemic era was a discussion strategy because this strategy was very easy to implement by the teachers, especially in grade VII.

B. Suggestions

The suggestion from the researcher is purposed for English student at UIN Antasari Banjarmasin, for English teacher, and also for future researcher want to conduct the similar research. The researcher hopes this research can be implemented every single element that related with English teaching.

1. English student at UIN Antasari Banjarmasin

This research can enlighten teacher students, particularly those who were chosen as research informants for this study, on teacher student practices for teaching English online during the pandemic era.

2. English teacher

The findings of this study can be used to develop an online teaching strategy that will make the online teaching and learning process more active and efficient.

3. Future researchers

Because this study focuses on the strategies employed by the teacher to maintain activeness in teaching English online during the pandemic era. It is suggested that other scholars perform online learning research. There are a number of new topics that can be investigated in relation to online learning or teaching strategies. Researchers might also look on student techniques for participating in online English classes.
