

CHAPTER V

CLOSURE

In this chapter, the conclusions from the findings of the processed data will be explained. Also includes suggestions from researchers on the data that has been found on the problems encountered and theories that might be applied.

A. Conclusion

The conclusion consists of two points to answer the research questions.

These two points include observation data and documentation data

1. Based on the research that the researcher did on video on the Guruku Mr.D youtube channel, the researcher concluded that all methods used to convey and process the material were Audio Lingual which included lectures, simulations and demonstrations. Some videos combine this method with other methods such as in video number 13, Mr. Dennis also uses the Participatory method by using the discussion method, and in videos 10,11,12,15,16,18, and 19, he uses the Productive method. Mr. Dennis uses the Field of Experience method to create an experience in pronouncing words well.
2. Based on the research that the researcher did on the video comments on the youtube channel of Guruku Mr.D. The researcher concludes that viewers from Indonesia who watch the Guruku Mr.d youtube channel are interested in 6 things. First, the way Mr. Dennis explained English with Indonesian where Indonesian is not his first language. Second, the delivery of material in the video is funny and warm. Guruku

Mr. d youtube channel also collaborated with several influencers, then Mr. Dennis also did not hesitate to answer questions in the comments column even though they were not related to the material presented. Not infrequently, some viewers' requests in the comments column were made with explanation videos. finally, Mr. Dennis also very often inserts vlogs and advice on his channel. These 6 reasons make Indonesian people like this channel that provides English learning.

C. Suggestion

Suggestions consist of two points, namely addressed to the teacher and further researchers. These two points include suggestions for theories found to be applicable in teaching and suggestions for research on similar themes.

1. For teachers, the results of this study are expected to be applied to actual learning methods. Researchers see great potential in Mr. Dennis, the owner of the Guruku Mr.D youtube channel, whose delivery is light and fun, is also quite funny. This should be imitated by all learning teachers, especially in English lessons. With a pleasant demeanor, the material will also be easily conveyed, and give an impression on students. Not only delivering learning materials, but also being a partner who builds an environment that supports them to be able to speak confidently in English.

2. For other researchers, the results of this study can be used as a reference for further research related to learning methods and which pay more attention to aspects of the research subject that are more interesting. It is expected to pay attention to aspects or rules that must be met in making a good measuring instrument.
