This research was motivated by the high level of farmer community awareness that occurred in Handil Birayang Village, Kec. Bumi Makmur, Tanah Laut Regency is very high, because the majority of the people are very much where the main income of the people is from the sale of agricultural products, but it does not discourage them from being able to perform hajj and Umrah. The research method used is descriptive qualitative. The data were obtained by the author using interview techniques, with the number of informants as many as 12 people. The data obtained is then processed with editing, clarification and description techniques which are then analyzed qualitatively with a theoretical basis reference.

The result of the research conducted by the author is that all informants have carried out Umrah and 1 informant has carried out hajj, namely Hj. Mastika. For motivation in residing because of waiting for a long hajj queue, pilgrimage to the burial of the Prophet Muhammad saw, opening the door of rezeqi, seeing the Kaaba visiting Makkah and Medina, being worshipped by Allah, avoiding paganism, taking away sins, umrah is a jihad, and longing to want to return.
