

## **CHAPTER V**

### **CLOSURE**

This chapter presents the conclusion and suggestions about the result of this study. The conclusion is meant to answers the research questions. The suggestion are provided to expect better improvement for teacher, students, and future research that related to this study.

#### **A. Conclusion**

After conducting the research, collecting the do analysis, and present the result. So in this part the researcher would like to draw a conclusion.

1. The students' readiness in preparing technology for online learning is good. Many students have tools to learn online such as cellphones, laptop and other. But not all students master and understand how to use online learning media. During online learning, some students experienced problems in terms of internet connection, internet quotas, and also a comfortable place to do online learning from home. It all makes them think that classroom and face-to-face learning is better than online learning from home.
2. The students' emotional perception in learning at SMPN 23 Banjarmasin during covid-19 showed that they preferred to do face-to-face learning in the classroom. At first they felt happy doing online learning because they did not need to go to school to learn and some of them could help their

parents at home. However, the readiness of the internet connection that is not good makes their online learning activities disrupted. Some of them also complained about their unfocused learning during online leaning.

## **B. Suggestions**

Based on the discussion and conclusion, the researcher gives some suggestions as below:

1. For teacher

English teachers at SMP 23 Banjarmasin are suggested that the teachers should be creative to design online learning be more fun and interesting for students. before study the teacher must know the students skill with the media.

2. For students

Students at SMP 23 Banjarmasin are suggested that they should be able to adapt of using technology to conduct online learning for the future learning process be better.

3. For the future research

The researcher suggest to the future reseach to conduct another research with the same topic but focus on the effect of emotional students when doing online learning.
