

CHAPTER V

CLOSURE

A. Conclusion

Based on the description that has been put forward in the previous section, it can be concluded as follow:

1. The implementation of guided questions and answers through online learning consists of three activities; opening, main, and closing. The teacher uses the WhatsApp application as the media in the teaching and learning process. The steps that the teacher to in the teaching and learning process are: 1) The teacher gave an explanation about paragraph writing. 2) The teacher gave an explanation about Guided Questions and Answers. 3) The teacher gave an explanation and the example of making paragraphs using Guided Questions and Answers. 4) The teacher asked the students to make a paragraph. 5) The teacher guided the students in gathering ideas to make paragraphs using Guided Questions and Answers. 6) The teacher checked the result via WhatsApp privately. 7) The teacher gave feedback to the students via WhatsApp privately.
2. Students' perception of the implementation of guided questions and answers through online learning is believed that the guided question and answer technique can help them get more ideas, make the paragraph more united and structured, and arrange sentence by sentence. Therefore, the students thought that there was no difficulty in writing a paragraph using the guided question and answer through online learning.

B. Suggestions

As a follow to the research results, here are some suggestions from the researcher:

1. Suggestions for the teacher

Based on the findings, the results of this study state that the implementation of guided questions and answers helped overcome their problem in writing a paragraph. Therefore, the English teacher who teaches online learning should use guided questions and answers in teaching paragraph writing.

2. Suggestions for the next researcher

The researcher believes that this research can be used as a helpful reference for the next researcher, especially in the educational field. The researcher hopes that other researchers are willing to conduct more profound research related to this study. The next researcher also can conduct research with different skills or replace online learning with other conditions such as blended learning.
