

CHAPTER V

CLOSURE

A. Conclusion

According to the data explained before, there are two points that the researcher writes as conclusion of this research:

- 1.) According to the questionnaire participants mostly assumed that the implementation of AREL helped them to grow confidence. AREL is a good technique for teaching speaking.
- 2.) According to the interview learned about AREL the participants stated they lack confidence before learning AREL. After learning AREL participants assumed that they have more confidence.

B. Suggestions

1.) For teacher

According to the data above the implementation of AREL is approved and can grow speaking confidence. Not only speaking confidence but also speaking proficiency. However, the researcher suggests that the teacher try this technique in speaking class even if for students in school or higher education.

2.) Next researcher.

For the next researcher, the researcher suggests to find the other part of learning that also can improve by AREL technique. AREL not only can grow speaking confidence but also the other skill of English.
