

CHAPTER V

CLOSURE

A. Conclusion

Based on the finding and discussion, it can conclude that:

1. The source of reading materials that students used for individual learning in English class from school recommendation and also provide the link to support teaching and learning activity. The source of reading materials can be accessed by link and for other sources using such as watch video from YouTube, Textbook from the link based on made by school.
2. The challenges that students face when using the source of reading materials for individual learning in English class such as lack of vocabularies, grammatical error, do not understand meaning, difficult to translate every new word.

B. Suggestions

Here are suggestions the researcher deliver for future studies. Hopefully, the suggestions are useful for readers in general, and researcher and other people involved in education especially. The suggestions are as follow:

1. For the English teacher not only give materials and also assignment or task the teacher should provide appropriate source of reading materials for support teaching and learning activity and Teachers must continue to

monitor and manage learning well. Take advantage of innovative applications so that children do not get bored while learning.

2. For Students can be expected to be more proactive in learning activities and more independent to learn the given material. The thing that needs to be improved again is a sense of responsibility towards yourself to achieve the desired achievement results. Students are more independent to explore the facilities that have been available through the internet as learning materials to achieve the expected learning results and also students must be more diligent, creative in following learning from teachers, not relying on others in carrying out learning.
3. For the next researcher this research only focused on reading materials that students used for individual learning in English class. Therefore, the other researcher who are interested in the same field are suggestion to conduct in other phenomena.
