Kata Kunci : Meningkatkan, Sikap Tanggung Jawab, Metode Proyek

Tanggung jawab adalah kesanggupan untuk menetakan sikap terhadap suatu perbuatan atau tugas yang diemban atau tuntutan terhadap penyelesaian tugas, tanggung jawab tidak hanya untuk diri sendiri tapi juga terhadap orang lain. Penelitian ini bertujuan untuk mengetahui aktifitas anak dalam upaya meningkatkan sikap tanggung jawab anak melalui metode proyek pada anak usia 5-6 Tahun di TK. Tarbiyatul Athfal UIN Antasari Banjarmasin.

Penelitian ini adalah jenis penelitian tindakan kelas yang dilaksanakan selama 2 siklus, setiap siklusnya terdiri dari perencanaan, pelaksanaan, pengamatan, dan refleksi. Subjek penelitian adalah anak usia 5-6 tahun di TK Tarbiyatul Athfal Banjarmasin yang berjumlah 13 anak. Teknik pengumpulan data melalui observasi, dokumentasi. Analisis data menggunakan kombinasi pendekatan kualitatif dan kuantitatif.

Hasil penelitian menunjukkan bahwa perkembangan sikap tanggung jawab anak menunjukkan adanya peningkatan perkembangan, pada siklus I ada sebanyak 7 anak atau sekitar 53,8 % yang mencapai kategori berkembang sesuai harapan dan berkembang sangat baik. Pada siklus II ada 11 anak atau sekitar 84,62 % yang mencapai kategori berkembang sesuai harapan dan berkembang sangat baik. Hasil pencapaian indikator keberhasilan pada siklus II telah mencapai target ketuntasan yang diharapkan yaitu 80% anak berkategori tuntas.

ABSTRACT

Herlianti, 180101081188: *Efforts to increase the attitude of responsibility in children through the project method at Tarbiyatul Athfal Kindergarten UIN Antasari Banjarmasin. Supervisor I Nor Izzatil Hasanah, S.Pd, M.Pd, and Supervisor II Drs. Samdani, M.Fil.I, at the Tarbiyah and Teacher Training Program at UIN Antasari Banjarmasin. 2022.*

Key Word : *Increase, Attitude of responsibility, Project Method*

Responsibility is the ability to set an attitude towards an act or task that is carried out or demands for the completion of a task, responsibility not only for oneself but also for others. This study aims to determine the activities of children in an effort to increase the attitude of children's responsibility through the project method for children aged 5-6 years in kindergarten. Tarbiyatul Athfal UIN Antasari Banjarmasin.

This research is a type of classroom action research which is carried out for 2 cycles, each cycle consists of planning, implementing, observation, and reflection. The research subjects are children aged 5-6 years in kindergarten Tarbiyatul Athfal Banjarmasin, totaling 13 children. Data collection techniques through observation, documentation. Data analysis uses a combination of qualitative and quantitative approaches.

The results showed that the results of the study on the development of children's responsible attitudes showed an increase in development, in the first cycle there were 7 children or about 53.8% who reached the category of developing according to expectations and developing very well. In the second cycle there were 11 children or about 84.62% who reached the category of developing according to expectations and developing very well. The results of achieving success indicators in cycle II have reached the expected completeness target, which is 80% of children in the complete category.
