

ABSTRACT

Putriani, 2021. *Effect of Capital and Operating Hours on Net Income of Street Vendors in Pemajatan Gambut Village. Thesis*. Sharia Economics Study Program, Faculty of Islamic Economics and Business. Supervisor I : H. Badrian, M.Ag., Supervisor II : Lutpi Sahal, MSI.

Keywords: Capital, Operating Hours, Income, Street Vendors This research is motivated by the fact that every city in Indonesia does not

inseparable from the existence of street vendors, Banjarmasin is no exception. street vendors

The company sells various types of merchandise, one of which is food and beverages. Street vendors (PKL) are a gap for people who do not have the education and skills to survive. One of them is a street vendor in Pemajatan Peat Village. Then the relatively small or low net income of street vendors is often influenced by several factors. These factors include Capital and Operating Hours.

This study aims to determine the effect of capital and operating hours on the net income of street vendors in Pemajatan Gambut Village partially and simultaneously.

This research method uses a quantitative approach with random sampling method and is a type of field research. The sample used in this study amounted to 40 respondents with data collection techniques in the form of questionnaires and documentation.

The results of this study indicate: First, capital and operating hours have a partial effect on the income of street vendors. This can be seen from the tcount value of 1.261 with a sig of 0.215. Second, capital and operating hours have a simultaneous effect on the income of street vendors. This is explained by the Ftable of 4.21, the value indicates that the value of Fcount < Ftable (543,604 > 4.21). So it can be concluded that H0 is rejected and Ha is accepted.
