

CHAPTER V

CLOSURE

A. Conclusion

Based on the findings and discussion, it can be concluded that the teacher has his way to apply flipped classroom in online learning at SMK 1 Martapura. Researchers also found several factors that became obstacles in online learning, such as problems with internet access, family environment, community environment, and full storage of students' smartphones. And found their own solutions from the students.

B. Suggestions

The researcher makes the following suggestion based on the discussion and conclusion.:

1. For the teacher, better before use flipped classroom model get source theory about flipped classroom, procedures the model by the creator, and how to make students' self-learning efficient. And do not forget to evaluate the model and get to know what the experience problems from the students.
2. For the government, in the pandemic situation government should understand and give facilitation for students and teacher the schools in their location.
