Keywords: Fighting power, Completing Thesis

This study aims to determine the fighting power of students in completing a thesis. The subject of this study was a student of the 2015 Islamic Psychologist Study Program, Faculty of Ushuluddin and Humanities UIN Antasari Banjarmasin. A total of 22 students. The fighting power in this study is the ability of students to complete the thesis and overcome the difficulties encountered during completing the thesis.

In this study, the method used was a quantitative descript method using a simple linear regression analysis test. The sampling technique in this study used saturated sampling with data collection instruments using the Likert model scale. The subject of this study was a 2015 student of the Islamic Psychology Study Program, Faculty of Ushuluddin and Humanities UIN Antasari Banjarmasin and the sample size in this study was 22 people from a total population of 22 people. And the object of this study is Fighting power as a free variable.

This research is a descriptive quantitative study. The data collection tool is the Questionnaire of Fighting Power in Completing the thesis, totaling 46 items compiled by the researcher. The questionnaire was prepared based on 5 aspects of fighting power by Stoltz, namely (1) Control, (2) Origin, (3) Ownership, (4) Reach, (5) Endurance. Validity measurement uses fill validity, further tests the differentiability of items and produces 60 valid items Reliability measurement using Cronbach's Alpha formula with a reliability coefficient of 0.719

The results showed that the level of fighting power of 2015 students in completing the thesis of the Islamic psychology study program, faculty of ushuluddin and humanities UIN antasari banjarmasin is classified as a medium category , namely 15 students (68.20%), while the low category is 4 students(18.60%) and high category as many as 3 mahastudents (13.20%). Mahasiswa has a moderate level of fighting power in responding to the difficulties they experienced while completing the thesis. However, under certain conditions, students are still able to respond well to difficulties as shown by the results of the analysis of item score achievements.
