Abstract

B *I* x^2 x_1

Indonesia has a variety of cultures, one of which is Pagatan woven fabric. Pagatan woven fabrics with various motifs are a form of cultural linkage with mathematics. Ethnomathematics is a science of connecting mathematics and culture which will be more easily accepted and understood by students and will increase their interest in learning. The type of research used is field research where researchers go directly to the field using qualitative approaches and ethnographic methods. Methods of data collection using interviews, observation and documentation. The owner and employee of Pagatan Weaving Salmah became the subject of research, while the objects of research were the motifs of woven fabrics and the fundamental mathematical activities according to Bishop in the process of making Pagatan woven fabrics. The data analysis technique used in this study went through these stages: namely data reduction, data presentation, and drawing conclusions. The
