FINDINGS AND DISCUSSION

The Researcher collected and analyzed data from Trevor Noah's words in the Daily Show with Trevor Noah. Researchers Investigate 4 Videos on the Youtube Channel, namely: Happily Trevor after: Accents, Trump & More | The Daily Show , Who are the supporter at the World Cup ? Between scenes | Daily show, Check out this mother fucker: Trump Family Edition Throwback Daily show, Qatar world cup rainbow ban & Japanese clasy win.

A. The Findings Level of Critical Discourse Analysis Satire in The Daily Show With Trevor Noah

The results of satire analysis in the daily show with trevor noah are presented using CDA based on Van Dijk's theory, namely. macrostructure, microstructure, and superstructure. The first dimension is the Macrostructure of the text, namely thematic then the Microstructure of the text is divided into Semantics, syntaxes style. Semantics is divided into background, detail . Then syntaxes style is divided into coherence, sentence form and pronouns, and the last is superstructure or schemata. Therefore , by using this kind of discourse analysis, the researcher can discover the concept of the text. This kind of text will make the public understand what the speaker conveys to the audience through his speech which is made in a

text.

After conducting research, researchers found 3 types of critical discourse levels, then researchers analyzed the text structure of each video.

Video 1 : Happily trevor after : Accents , Trump & More | The daily show

1. Macrostructure of the text / Thematic

The theme describes what the core idea or core message is that shows important information, what the speaker wants to convey or express, namely Trevor Noah on his YouTube channel.

a. About African parents

Datum 1

“ Please do not try this if you have african parents. (Audience Laughing)

Yeah. Because You’ll be like, I Faked my kidnapping. And They’ll be like, but Your funeral will be real, ah?

If you told an african parent. That you won’t swim without a lifeguard , they’ll be like ,eh,

Do you know who is your lifeguard ? Jesus . “

In this video, the first theme discussed by Trevor Noah is about African parents who will worry if their children go to the beach without guards or bodyguards, African parents also really love their children by showing how hard they beat, African countries are also countries filled with Giraffe conveyed this to Trevor Noah with a satire that made the audience laugh.

2. Microstructure of the text

Syntaxes Style

utilizing speaker coherence to make sure the audience comprehends the ideas being discussed. Pronouns, coherence, and sentence structure are a few syntactic styles that critical discourse analysis scholars need to assess and investigate.

a. Cohesion

Conjunction usage demonstrates how speakers conjure up cultural pictures in their minds. The use of conjunctions in critical discourse analysis is crucial because it highlights the statements that come before or contradict the first phrase.

Datum 2

“Please do not try this if you have african parents. (Aduence Laughing)

Yeah. **Because** You’ll be like, I Faked my kidnapping. And They’ll be like, but Your funeral will be real, ah? “

Datum 3

“Hurry, move those classified documenta so I can illegally hide them from the FBI **but** first, let’s all wave at that blinking red light and tell it our names, Donald J. Trump. The J stands for genius.”

Datum 4

“hey patron, you ever had one of those days where you thought you had something in your pockets, **but** you check and then it’s missing? “

b. Sentence form

Sentence structure is a syntactic element connected to logic. Whether a sentence expresses a subject explicitly or implicitly depends on the sentence structure.

Datum 5

“There is only one king in this world and that Jesus.” Passive Sentence

Datum 6

“Trump is too busy to testify?” Active Sentence

Datum 7

“Your boss father is a rich guy who does nothing but complain.” Active Sentence

c. Pronouns

In order to regulate language, pronouns create an imaginary civilization. The pronoun has an implicit connotation and refers to people as individuals rather than as members of a community. A pronoun is used by the speaker to express the position of an individual or group.

Datum 8

“Please do not try this if you have African parents. (Audience Laughing)

Yeah. Because You’ll be like, I Faked my kidnapping. And **They**’ll be like, but Your funeral will be real, ah? “

Datum 9

“Hurry, move those classified documents so **I** can illegally hide **them** from the FBI but first, let’s all wave at that blinking red light and tell it **our** names, Donald J. Trump. The J stands for genius.”

3.Superstructure Of the text

Schemata

The text's superstructures or schema resemble its shape. The schema used the headline, principal theme, and then explain the incident structure because the bulk of earlier studies analyzed news reports. In contrast, Van Dijk's Socio Cognitive Approach theory is used in this work to go further into the speech system.

The World Cup was organized by Qatar, a large oil producing country. Trevor asked the audience for the correct Qatari pronunciation whether "Cutter" or "Cut-her" while laughing. He also said that there was a bit of a crazy story, namely about Chinese government TV not showing footage of fans because China doesn't

want its citizens to see people in other countries having fun without wearing their sarcasm masks.

And at the end of the video Trevor also insinuated about Japanese fans picking up trash after the game took place "if you want to have a party don't forget to invite Japanese fans because then you don't have to bother cleaning it up" he said with a laugh.

B. The Findings Social Cognition on Satire in The Daily Show With Trevor Noah

Social Cognition Is An Element In Teun A Van Dijk's Critical Discourse Analysis Which Is Intended To Describe The Author Or Creator Of The Text. Critical discourse analysis by Van Dijk not only looks at it from a linguistic point of view but also from its social cognition. In the Teun A. Van Dijk Model it is determined in what scheme the minutes are made. This scheme is conceptualized as a structure that includes how we view people, social roles, politics and events. Here the researcher analyzes social cognition based on the thoughts of a writer or presenter, namely Trevor Noah, and what opinions are expressed by him.

B. Discussion

In this discussion section, the researcher describes the findings on the level of critical discourse analysis and social cognition contained in the Satire in The Daily show With Trevor Noah. The use of the language used by Trevor is simple language that is often used in everyday life. Language is an aspect that is very necessary in life to convey something. Language aims to be able to communicate with humans and be able to know the meaning you want to convey. This thesis is a form of communication about satire which was conveyed by Trevor Noah in his video entitled

A. Level of Critical Discourse analysis

The first is the level of Critical Discourse analysis used by Trevor Noah on Satire in The Daily Show. Critical Discourse analysis is found in the analysis of texts made by speakers. This is related to Teun A van Dijk's theory. For Van Dijk, text research cannot only be seen based on text alone, because texts are only the result of production practices that need to be observed so that a text is formed. To find out the hidden meaning in the

analysis of the text contained in Trevor Noah's satire, the researcher uses the discourse analysis method developed by Van Dijk. Through his various works Van Dijk sees a discourse as consisting of various levels, each part of which supports the other. Van Dijk divides these levels into three levels.

1. Macrostructure

The first level is macrostructure, namely thematic. The theme describes what the core idea or core message is that shows important information, what the speaker wants to convey or express, namely Trevor Noah on his YouTube channel. According to Eriyanto The topic is the most important structure to be assessed in Van Dijk's macrostructural analysis. He also looked into the theme's origin, which is derived from the Greek verb *tithonai*, which means "to find." The theme of textual meaning is what the author or speaker wishes to get through most clearly. The theme is frequently connected to the topic since it captures the key ideas that the speaker wants to get through. The theme in a speech expresses the intents, primary points, and ambitions of the speaker. As a result, the researcher must first understand the entire text before selecting a topic.

Each speech or text has a distinctive theme that encapsulates what the author wishes to communicate to the audience. The researcher must be aware of the social setting in which the speech is delivered in order to properly comprehend the speech's substance. There are 4 videos that have been analyzed by researchers to determine the theme of each video.

This structure is the general meaning of a text which can be observed by looking at the topic of discussion in a text. In the macrostructure, it does not only discuss the theme of a text but also certain sides of an event, such as in the video entitled "Happily Trevor After : Accents , Trump & More | The daily show ". There are two themes in the video, about African Parents and Trevor's Trump impersonation.

In this video, the first theme discussed by Trevor Noah is about African parents who will worry if their children go to the beach without guards or bodyguards, African parents also really love their children by showing how hard they beat, African countries are also countries filled with Giraffe conveyed this to Trevor Noah with a satire that made the audience laugh.

Then on the next video is "Who is Trevor after Supporting in The world Cup? Between the scenes | The daily show ". This video discusses the support of football fans at the world cup, Trevor Noah discusses what he likes about this world cup and what the audience likes. Not only discussing the supporting team, there were jokes and satire during the event which were conveyed by Trevor Noah. Next video "Look at these assholes : Trump family edition | The daily show Throwback" in this video, Trevor Noah discusses the Trump family, which he calls a family of bastards. It is clear that Trevor Noah satirized the country's top officials by saying bastards. Trevor also did not hesitate to tell that Trump has taken money from charities with some jokes. and The last Video is "Qatar's world cup

rainbow ban & Japan's Classy Victory” In this video the topic of discussion is the World Cup which is being held by Qatar in 2022 Trevor discusses some of the controversies that existed during the world cup including the state of Qatar which prohibits players at the world cup from having same-sex relations. Trevor Noah several times quipped about this in his show. Trevor Noah gave a satire to Chinese government TV which didn't show fans of other countries he also gave a satire to Japanese fans who clean up trash when the game is over.

2. Microstructure

The microstructure is divided into two parts, namely semantics and syntax styles. The semantics in Van Dijk's scheme are categorized as local meanings, namely meanings that arise from the relationships between sentences, the relationships between proposals that build certain meanings in a text structure. Discourse analysis focuses a lot on text dimensions such as explicit or implicit meanings, hidden meanings and how people write or talk about them. In other words, semantics does not only define which parts are important from the discourse structure, but also leads to a certain side of an event. The following are elements that have an effect on semantics. Semantics is further divided into Background and Details. In the background of the events contained in the video by Trevor Noah, the researcher found a video entitled "Qatar's world cup rainbow ban & Japan's classy victory", namely "Qatar" as the host country for the 2022 World Cup, then in the details section the researcher found 4 data, then Syntaxes

style based on the conclusions of several research projects using Van Dijk's theory. By utilizing active and passive phrases, coherence, and pronouns in language structure, syntax style is employed in political manipulation. Utilizing speaker coherence to make sure the audience comprehends the ideas being discussed. Pronouns, coherence, and sentence structure are a few syntactic styles that critical discourse analysis scholars need to assess and investigate. In this analysis the researcher divides Syntaxes style into three parts, namely Cohesion, Sentence Form and pronouns. The first is Cohesion, which is a syntactic element that plays a role in the linkage of a sentence, as found in the findings of Satire in The Daily Show with Trevor Noah, researchers often find conjunctions such as Because and But. And the last one is Pronouns. Pronouns are pronouns for a sentence, researchers often find pronouns contained in Satire In the daily show with Trevor, namely the words They, Our, he, She and Them.

3. Superstructure

The text's superstructures or schema resemble its shape. The schema used the headline, principal theme, and then explain the incident structure because the bulk of earlier studies analyzed news reports. In contrast, Van Dijk's Socio Cognitive Approach theory is used in this work to go further into the speech system. Superstructures of the text are similar to the text's outline like Video 1 title : Happily Trevor After : Accents , Trump & More | The daily shows

At the beginning of Trevor Noah's video, he tells about African parents, then in the middle, he talks about the American president, Donald Trump. Trevor also imitated the speech style of a president while conveying several jokes and satire against the country's top officials and at the end of the Trevor Video Noah issued impolite words in front of the audience. And then Title : Who is Trevor Supporting in the World Cup ?

Between the scenes | The daily show , Trevor discussed support for the football team at the Qatar world cup he said that Ghana was number one for him. In the middle of the event, Trevor satirized the Saudi Arabian fans. love sports fans who get cocky when the team they support does their best.

Next vidoe is Look at these assholes : Trump Family Edition | The daily Show throwback. In this video, Trevor discusses the family of the American president, Donald Trump, who has a long history of being assholes, he said. Trevor said that he was the least cold human of all time.

In the middle of the video Trevor also discussed a sheep while laughing and at the end of the video again Trevor satirized Donald Trump to pay money for stealing money from charities for political needs. The court also ordered his three children to attend training sessions on how not to steal money from charities Trevor said with a laugh . And The last Qatar's World Cup Rainbow tires & Japan's Clasy Victory. The World Cup was organized by Qatar, a large oil producing country. Trevor asked the audience for the correct Qatari pronunciation whether "Cutter" or "Cut-her" while laughing. He also said that there was a bit of a crazy story, namely

about Chinese government TV not showing footage of fans because China doesn't want its citizens to see people in other countries having fun without wearing their sarcasm masks.

And at the end of the video Trevor also insinuated about Japanese fans picking up trash after the game took place "if you want to have a party don't forget to invite Japanese fans because then you don't have to bother cleaning it up" he said with a laugh.

B.Social Cognition

Social cognition is an element in Teun A Van Dijk's Critical Discourse Analysis which is intended to describe the author or creator of the text. The basis of social cognition is public opinion that has been ingrained and has become a general meaning and is used to see certain events. The cognitive approach to social cognition is based on the assumption that text has no meaning, but that meaning is given by the language user.

Critical discourse analysis by Van Dijk not only looks at it from a linguistic point of view but also from its social cognition. In the Teun A. Van Dijk Model it is determined in what scheme the minutes are made. This scheme is conceptualized as a structure that includes how we view people, social roles, politics and events. Here the researcher analyzes social cognition based on the thoughts of a writer or presenter, namely

Trevor Noah, and what opinions are expressed by him.

As Trevor Noah did in his daily program, there is a video entitled "Happy Trevor After: Accents, Trump & More | The daily show "Here Trevor imitates the style of an American President, namely Donald Trump, starting from the way he speaks, how to convey something and his facial expressions. Trevor is also not afraid of his satire of Donald Trump as he said that stealing was Donald Trump's idea. Donald Trump's social life seems to be considered by Trevor as just a joke, this is very clear in the video upload, even many of the viewers laugh at it. Trevor also said several times that the words were impolite, fortunately there was a sensor on his speech. Trevor thinks that Donald Trump is not really leading a country. This is what influences the formation of a discourse.

Then in the video entitled "Who is Trevor Supporting in The World Cup? Between the scenes | The daily show "here discusses who Trevor Noah supports and asks the audience on his Daily show about who they support. When Trevor asked "Who do you support" some of the audience answered Saudi Arabia, Trevor Noah was surprised and said "Saudi Arabia?" Well, your heart's gonna be broken, Trevor casually said it was For the audience, while laughing Trevor continued his sarcasm towards the audience "I mean, I'm happy for you, but yes you know the fun thing about being South Africans is our hearts have been broken previous "Here the researcher found that the social cognition that existed at the event was about how fans of a team where each team has its own strengths and

weaknesses. When Trevor thought that Saudi Arabia's supporters would break his heart, that was what became a discourse because it was not necessarily the truth.

The next is a video entitled "Look at these assholes: Trump Family edition The Daily Show Throwback". Here, Trevor Noah discusses the Trump family, which has a long history as bastards. Trevor casually without fear to call state officials, namely the president of America, Donald Trump and his family, as bastards. Trevor is very often sarcastic about the Trump administration, Trevor insinuated Trump that if Trump wasn't rich then he would be like someone pretending to be sick and dying. The social life experienced by Trump is considered a life full of drama by Trevor Noah.

And the last one is a video entitled "Qatar's world cup rainbow tires & japan's classy victory". Trevor alluded to Japanese fans cleaning up trash after the game took place. But unfortunately they were caught by the Qatari police because they thought they were a bit gay, Trevor Noah also insinuated that Japanese fans should be invited if the audience at his event is having a party, because then they don't have to clean up the rest of the party because it will be taken care of by Japanese fans he said with jokes and laughter. This can be called a social cognition that exists in the Qatar world cup and that is what influences the formation of a discourse.
